

Introduction to clean air-indicating lichens

Saturday 9th March 2019 10am—2pm

Price: £10. Meet: Byrness Village Hall

How clean is your air? A basic introduction to lichen biology and learning how to identify some common lichens. Discover what these lichens can tell us about air quality. See how many we can find in the local area. Learn how to do a survey in your area and how to report your findings.

Introduction to newts and other amphibians

Saturday 6th April 2019 6pm—8:45pm AND Sunday 7th April 2019 8am—9am

Price: £20. Meet: Otterburn Memorial Hall

This two-part event will give a good understanding of newts and other amphibians. It will cover species identification, their ecology and survey methods, touching on the legal aspects of newt surveying and the protection afforded to amphibians. Saturday evening will involve a classroom session, setting survey traps and undertaking a torch survey. The following morning we will empty the traps, record our findings and release what we have caught.

Booking for these events is essential.
