

Halfway Community Council - IMPORTANT INFORMATION

Planning Application (HM/17/0260) for a huge 90m Waste Incinerator Plant on Whistleberry Road, Blantyre

HCC have already objected to this unwanted development due to feedback from the community at a public meeting and we need to make you aware of the impacts:-

- This huge plant is only a few miles from Cambuslang East community (Blantyre (B) on map)
- The emissions funnel will be 90m tall, 50% higher than the County Buildings. See <https://www.youtube.com/watch?v=0qoGESxLI04> for impact.
- Cambuslang's pollution levels are already unacceptably due to high volume road & motorway traffic pollution & existing waste incinerators e.g. at nearby Dalmarnock (Polmadie) – P on Map
- The emissions impact will reach a 6 mile radius distance (see map) and link for impact: <http://plumeplotter.com/whistleberry/>
- Modern incinerators produce harmful toxic fly ash - see <http://ukwin.org.uk/oppose-incineration>
- It's a venture capital investment project with no ECO/environmental advantages (only for profit)
- Huge lorries will come from all over the UK and the site will only employ approx. 20 people
- The incinerator will have to go into Home Reports for those selling their homes nearby

Want to object NOW to the proposed waste incinerator? Blantyre Community Council have made this easy by doing two things:-

1. Sign the petition and share with your friends - <http://bit.ly/2uRzOfS>
2. Sign the objection letter - <http://bit.ly/2u0eeDU>

Save the Next Generation - Say NO to Toxic Waste Incineration
Waste Incinerator Plants:- Blantyre (B) and Polmadie (P) (6 mile radius)
