BCA Registered Hall User Groups	£3.00	per person per session - recommended rate
--	-------	---

The User Group rate was originally introduced to ensure smaller number groups of local residents were not penalised by having to pay the full 'per hour' rates for using the hall. The recommended User Group rate assumes the hall is used for up to 2 consecutive hours for any one User Group session. This rate is for guidance only, so any individual User Group member who lives in the local community area may pay whatever they think this particular use of their hall is worth to them. Under no circumstance should any such payment cause any individual undue financial hardship. Registered Hall User Groups MUST be formally represented on the Burray Community Association Committee.

Electric Heating in the Hall

Heating for the Hall is provided via a wind turbine sited at the nearby football field. The wind turbine supplies enough electricity to charge up large storage heaters in the Main Hall and Meeting Room areas. When fully charged, these heaters will provide sufficient heat to keep the rooms comfortably warm for up to three hours continuously. Assuming the wind turbine continues to generate when the hall is not being used, these heaters will re-charge again and be available for the next session. If for any reason the storage heaters discharge prematurely, there are other electric wall heaters permanently installed in both main areas and available to use as an alternative source of space heating. Electricity for the wall heaters is supplied by our electricity providers and provided to users by feeding £1 coins into a meter in the electricity cupboard. As a very rough guide, a £1 coin will give around 30 minutes additional wall heater time.
