

Fun, Games & Hard Times

After the great Terence O'Hagans book *Come on Then* following Huddersfield Town, *Fun, Games & Hard Times* is another cracking casual book written by Town's supporter Jasper Thompson. This is an account of his involvement in the football hooligan scene following Huddersfield home and away. It is a rollercoaster story of their crew scuffles with rival firms, Saturday away days with the lads. Jasper describes very well his racks with Town boys in the late 80's and 90's up & down in the country, and trips with England, how he made friends behind the football violence. There is a story of loyalty to family and friends, the lads who always stand their ground. This is a tale how his life is changed forever when is hospitalized & diagnosed with FND (Functional Neurological Disorder) and his battle with it. A must read for all football supporters and those 'in the know'.
