

COMMUNITY INFRASTRUCTURE LEVY (CIL) ANNUAL REPORT 2023

Introduction

The Community Infrastructure Levy (CIL) is a levy which the Council charges on many new developments. The money raised helps to pay for the infrastructure needed across the city as a result of developments such as schools, strategic greenspace, flood defences, and strategic transport improvements.

Regulation 62A of the Community Infrastructure Levy (Amendment) Regulations 2013, requires local councils to report on CIL receipts, expenditure and balances. Local councils receive CIL funding via Meaningful Proportion, which takes place twice a year. This sees local councils receiving a percentage of any CIL money paid within their parish/town.

The report must be published either on the local council's website or on the website of the charging authority if the local council does not have a website.

A copy of the report must also be sent to the charging authority.

In order to ensure that all local councils have complied with the requirement, Dinnington Parish Council will publish a report annually on its website which covers the points raised by Regulation 62A to ensure complicity and ease of access of information.

This report relates to the financial year 2022-23 ("the reported year")

Dinnington Parish Council

Community Infrastructure Level (CIL) funding is paid for from new residential and retail development. Newcastle City Council (NCC) collect the levy and they then pass a proportion of CIL receipts (15%) to the Parish Council from developments that take place in their area. The funds need to be spent within 5 years, or the funds will need to be returned to NCC.

The purpose of the CIL is for the Parish Council to spend the funds to support development and growth of the area, this can be spent on the provision, improvement, replacement, operation or maintenance of infrastructure, or anything else that is concerned with addressing demands that development places on an area.

**COMMUNITY INFRASTRUCTURE LEVY (CIL)
