

## **Grangemouth Community Council – Update: 16 November 2023**

**INEOS Chemicals (ICGL):** Planned flaring was undertaken at approximately 09:30 on 14<sup>th</sup> November for a duration of 3 hours. No complaints were received.

**Petroineos Refinery:** Investigations by Petroineos and the Health and Safety Executive into the fire incident in early September are ongoing. This will be reported to SEPA in due course.

The planned restart of some refinery units following the recent maintenance period has been further delayed. The restart will require low rates of elevated hydrocarbon and sulphur flaring and steam venting as units are brought into operation. Petroineos will update the community through the usual channels prior to this taking place.

Since the last update SEPA has not received any public complaints in relation to Refinery operations.

**INEOS FPS Kinneil:** No updates to report.

**INEOS FPS Dalmeny Hound Point:** No updates to report.

**INEOS Grangemouth CHP limited:** No updates to report.

**INEOS Infrastructure Grangemouth Ltd:** No updates to report.

**CalaChem:** SEPA has received one complaint since the last update regarding a wastewater emission from a pipeline.

**Syngenta:** No updates to report.

**Fuji:** No updates to report.

**Versalis:** No updates to report.

**Celtic Renewables:** No updates to report.

**Inchyra Park Area\*:** Noise complaints were received at the end of October relating to a very high frequency noise, which was investigated by SEPA Noise Specialists. The source could not be identified due to the intermittent nature of the sound, and it has now ceased.
