

ABERFELDY COMMUNITY COUNCIL

August 2021 Community Council Meeting

Road Safety Working Group Feedback

20 mph Experiment

No real news. We still understand that a report on the trials and a new policy proposal will go to the environment committee towards the end of August. We have heard of no plans to consult or gather feedback from the community ahead of the report or policy being finalised. As you will be aware, Roddy Ross from Community Safety at PKC was gathering informal volunteered feedback and it appears that appeal was quite effective. I await a summary of the feedback from him.

We plan to submit our own views on the trial and policy development to PKC in the next few days. The first draft of the paper I prepared has been seen by Roddy Ross and he was quite positive about it.

I have no other news on this topic.

Pop-up Police

I received a request for these to be deployed on Old Crieff Road. Accordingly these were retrieved from Tayside Crescent, a risk assessment conducted and, following necessary repairs found to be required on return, these have been loaned to Cllr John Duff to deploy. Following that successful repair, have now repaired one of the other pop-up police and so these are now again available for use.

Highland Road safety Action Partnership

Last meeting in June.

Moving forward on staging "Night Driving Topic/Motorcycle safety training sessions/Older drivers safety sessions"

We now have a HRSAP Facebook page

Timber transport management was the main topic and there will be follow up

Working with PKC Traffic & Networks to progress on traffic calming once the policy is decided.

Trying to work on the model for getting PKC to progress community preferred actions, such as the Victoria Park entrance plan.

Among other things

Pat Spicer, 3/8/2021
