

HOUSE SPARROWS

Have you seen any ?

**M
A
L
E**

Male house sparrows have streaked brown and back wings with pale grey cheeks, a grey crown and black bib.

**DECLINING

L
E**

Female house sparrows are pale and lack the brown head and black bib.

House Sparrows are intensely social birds sharing a long association with man. Yet, despite their worldwide distribution and apparent adaptability House Sparrow populations are in decline in Britain. Does this urban species indicate a change in the quality of the environment in which we live?

Total Sparrows (Males and Females)	
How many Males ? (if possible).	
Where they were ! Postcode Eg: PA10 7PE	
Street Name Eg: Rockburn Drive	
Area Eg: Johnstone	

Please send us your 'sightings' :

**How many House Sparrows there are in the area
(Renfrewshire, East Renfrewshire & Inverclyde) ?
Can YOU help us with this survey ?**

If you have several observations, then please give the date for each set of observations. It would also be useful to know if you have put food out for the birds, if this is where you saw them.
