

The New Ecoquad!

Ecorider based in Nairn are pleased to announce the appointment of HBS Ring Ltd as area agents of the world's first 90 miles per gallon diesel powered quad bike, the Ecoquad.

Almost all farmers use quad bikes, AND almost all are fitted with petrol engines with high fuel consumption of 10-15 miles per gallon. Petrol prices are high and rising and there is the added inconvenience of regular visits to petrol station to buy the fuel.

Ecoquad fitted with a powerful 440 cc diesel engine is substantially different with very low fuel consumption at **90 miles per gallon on red diesel**. Farming in UK is under increasing financial pressure and savings need to be made where possible.

Ecoquad not only reduces running costs but also has a lower environmental impact.

Ecoquad is competitively price at just **£4395** plus VAT.

THE ECOQUAD IS

- Built With Farmers in Mind!!
- Cheap to Run on RED DIESEL (Already on the farm)
- Robust and Simple to operate and maintain
- 2 Year Warranty
- Low Cost **£4395**
