

COMPLIANCE SERVICES

 “SLR works with clients to develop effective processes to deliver compliance with environmental and Health & Safety obligations”

Organisations face increasingly complex compliance requirements, from new legislation, market expectations and customer demands. SLR's compliance services identify compliance requirements, assess compliance and provide assurance of compliance status.

INTRODUCTION TO SLR

SLR is an independent environmental consultancy providing a broad range of environmental compliance services across Europe, North America, Australasia and Africa.

Our specialists support organisations at strategic and operational levels, to develop and maintain effective environmental compliance processes that improve environmental, health and safety (EH&S) performance.

We support our clients by identifying their key compliance obligations, ranging from regulations in the jurisdictions where they operate, to customer and other stakeholder requirements.

SLR's technical specialists understand the compliance requirements applying in different sectors and jurisdictions.

We can support you in preparing to meet your compliance obligations relating to environmental permits, planning consents, EH&S legislation, international standards, sector protocols and your customers' requirements.

BUSINESS SECTORS

- Industry
- Oil & Gas
- Mining and Minerals
- Infrastructure
- Power
- Waste

TECHNICAL SERVICES

- **Environmental, Health & Safety and integrated compliance audits**
- **Identification of compliance obligations**
- **Development of internal compliance assurance processes**
- **Training and awareness-raising at all organisational levels**
- **Specialist support for compliance with:**
 - Environmental permit conditions
 - Planning consent conditions
 - Waste management legislation and Duty of Care
 - EH&S regulatory regimes

HOW CAN SLR HELP?

We are able to assist you with the following key services:

- **Establishing priorities for addressing compliance risks.** We review their sector EH&S compliance obligations, including all legal and other requirements, and develop registers or schedules of compliance requirements.
- **Undertaking environmental, health & safety or integrated EH&S compliance audits,** to determine compliance status and to evaluate the effectiveness of existing compliance management processes.
- **Providing senior management briefings** on compliance priorities and delivering training to staff at all levels on compliance requirements related to their roles.
- **Developing compliance management processes,** including:
 - Compliance evaluation tools as part of environmental, Health & Safety or integrated management systems
 - Environmental permit / licence applications
 - Construction environmental management plans (CEMP)
- **Supporting you in liaising with regulators** and complying with regulatory requirements for reporting on compliance performance.
- **Meeting a broad range of compliance drivers,** including for operations, services and products, taking account of customer requirements, sector codes or protocols, community agreements and any other stakeholder-driven compliance obligations.
- Waste management plans
- Asset management (environmental or safety-critical equipment) plans
- Fire prevention plans
- Operating Techniques
- Odour Management plans
- Emission Management plans
- **Provision of tailored training** programmes for your staff

SLR CAPABILITIES

- Our specialists, in a wide range of technical disciplines, understand the compliance requirements of regulatory and sector codes, standards and guidance.
- SLR's management systems specialist can support you in developing comprehensive compliance assurance processes within your existing management systems, or in constructing issue-specific compliance management tools.
- Our goal is to help you implement effective safeguards, taking a risk-based approach to prioritise management effort where it is needed.
- We can provide generic compliance training and briefings, or deliver detailed analysis of compliance obligations related to specific regulations or other compliance schemes, in all sectors and jurisdictions globally.
- Our experts participate in national and international working groups, liaison bodies and advisory committees, developing standards and guidelines on a wide range of EH&S performance and compliance issues. Their specialist knowledge can provide you with valuable insights into emerging compliance obligations.
