

## PRESS RELEASE

Differdange, May 24, 2017

### **'flibco.com' offers now its transportation service on the Canary Islands for the airports of Tenerife-North and Tenerife-South**

On Tuesday May 16, flibco.com has inaugurated its two new lines allowing passengers to travel easier from a lot of hotels and important places of the island to the airports of Tenerife-North and Tenerife-South.

Tenerife, the largest island of the Canaries archipelago, is resolutely turned towards tourism; with its 5 million visitors per year, the island makes part of the first Spanish destinations.

Both airports of the island (Tenerife-North and Tenerife-South) are connected with an important number of European capitals and big cities hosted by many airlines including Luxair, Ryanair, Transavia, TUI fly, WizzAir, Brussels Airlines, airberlin, British Airways, Iberia, Corendon and easyJet. Tenerife-South Airport, the most frequented of the island, welcomed last year more than 10 million passengers, an increase of 15% compared to 2015. Tenerife-North Airport recorded with more than 4 million passengers, a 10% growth in comparison with 2015.

As the leader of passenger transfer to the airports, flibco.com keeps spreading its wings internationally. After Lisbon, Porto, Madeira and Budapest in the first quarter of the year, this new service reflects the ambition of flibco.com to continue its implementation at popular holiday destinations in Europe. Moreover, the introduction of these two new lines represents a major asset in the development and accessibility of the airports for passengers.

As a company specialized in the transport to airports, but also aware of Tenerife's growing importance as a leading tourist destination in Europe, flibco.com naturally decided to offer its services to the island located in the Atlantic Ocean.

From now on, travelers may reach the two airports by enjoying the services of flibco.com, who guarantees a comfortable, convenient, economical and environmentally friendly way and drops the passengers off in front of the terminals.
