Protect your privacy on all devices with the easiest VPN app in the world.

F-Secure FREEDOME VPN is made with a simple goal: a powerful privacy and security app that is incredibly easy to use. Push one button and you can connect safely to any public Wi-Fi, block malicious sites and effortlessly get around certain geo-blocks to access the content you want to see.

Wi-Fi security

A hacker in the same public Wi-Fi can see everything you do on the internet. Protect your privacy and connect safely to any hotspot, wherever you are.

Privacy protection

Through hiding your IP address, encrypting your connection, blocking trackers and harmful websites, FREEDOME is a true powerhouse for privacy protection.

Browsing protection

FREEDOME warns you when entering potentially harmful websites. This ensures that you shop and surf safely online.

Change your virtual location

Increase your privacy and access more websites not available in your country. You can also watch online TV from your home country even when you are abroad.
