

## ProVal XL – Update to the Consolidation Module

There is a new release of the ProVal Consolidation Module which corrects the saving problem for not have had the problem and customers who use Microsoft Excel Version 2007. If you do not use this version of Excel then you will so there is no imperative to do the update.

Please download the zip archive from the following link and save to a temporary folder.

[http://sds-uploads.s3.amazonaws.com/2013-08-12-15-01-49-ProValXL\\_update.zip](http://sds-uploads.s3.amazonaws.com/2013-08-12-15-01-49-ProValXL_update.zip)

Extract the two files and save to your 'SDS ProVal' system folder, overwriting one file when prompted. The other file is a new template, Consolidation Version 820.xlt.

Afterwards, delete (or archive) the template file, Consolidation Version 819.xlt (and any other earlier versions) from the SDS ProVal folder.

There is no need to open the files.

This update does not affect existing consolidation files.

Note that this update only applies to the ProVal XL application.
