

# Bio Security

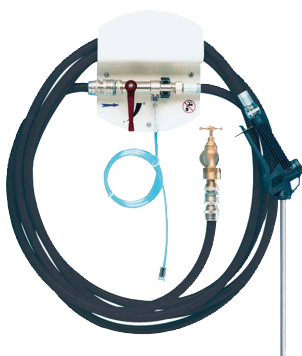

Reliability, Functionality, Quality Performance

## Application

We are all well aware of the long term commercial and financial implications that infectious diseases, and dangerous pests can have on a business, and the demand for efficient Bio security solutions is becoming increasingly prevalent.

As a leading supplier to the Agricultural sector for many years Seko is well aware of the markets needs and has developed a wide range of dosing solutions such as non electric spray & foam systems for vehicle and surface cleaning, simple and efficient dilution units for footwear sanitisation, and accurate and safe proportional dosing treatment of livestock drinking water.

### Surface cleaning systems

For surface cleaning and disinfection, SEKO has a wide range of high quality, robust, Non electric spray & foaming systems providing accurate dilution and maximum chemical efficiency.

### Dilution systems

For the accurate dilution of chemicals in to trigger spray bottles or buckets, the ProMax range of dilution stations provides a cost effective ultra low maintenance solution.

### Dosing pumps

With a range of speed, timed, probe and proportional control SEKO has a range of pumps to suit every dosing application.
