

Whitex

First of our bright, white and easy to harvest Curdivex[®] range

Matures approximately
2 days later than Freedom

Vigorous, upright plant habit
with bright, white curd

Easy to harvest due
to the curd being more visible

Cauliflower variety Freedom left versus Whitex right

CLASSIFICATION

Crop	Cauliflower
Segment	Main - Summer

Whitex (SVAC7366) is part of our new Curdivex® range of cauliflower. Cauliflowers in our Curdivex® range have 3 key attributes 1.) the white curd, 2.) a diverse set of new genetics in our pipeline 3.) the ability to give the grower a more flexible harvest window. Whitex matures in 72-78 days (UK & IE) and 70-75 days (Nordics & Baltics). Whitex has a vigorous and upright plant habit and produces a bright, white curd which is easy to see when mature. This easy to see curd helps with making harvest more efficient. Whitex also has excellent shelf life with the curd staying whiter for longer when compared to our current portfolio.

Whitex – A new introduction in our Curdivex® range with a bright, white curd which is easy to harvest.

CALENDAR – TRANSPLANTS UK & IRELAND

CALENDAR – TRANSPLANTS NORDICS & BALTICS

Recommendation: ■ Sowing ■ Transplanting ■ Harvest
