

Find the Way to Grandma's

I can count in steps of 5.

Can you help Little Red Riding Hood find her way to Grandma's house by counting in steps of 5? Colour in the circles to highlight the path.

The path starts at the girl and goes through the following numbers: 5, 10, 15, 20, 25, 30, 35, 40, 45, 50. The path ends at Grandma's house. There are also other numbers scattered around: 23, 18, 17, 26, 31, 19, 41, 40, 31, 35, 20, 26, 19, 40, 41, 50.

Find the Way to Grandma's

I can count in steps of 5.

Can you help Little Red Riding Hood find her way to Grandma's house by counting in steps of 5? Draw a path and fill in the missing numbers.

The scene is a forest with a winding river. On the left, Little Red Riding Hood is shown carrying a basket of flowers. On the right, there is a half-timbered house with a thatched roof. A path of circles leads from the girl towards the house. The numbers in the circles are: 5, 24, 33, 23, 4, 10, 35, 55, 50, 20, 60, 45, 75, 12, 24, 34, 45, 35, 83, 60, 80, 70, 90. There are several empty circles along the path for the student to fill in.
