

Can you climb the worlds tallest buildings?

1. Walk on a flat surface and see how long it takes to climb the worlds tallest buildings.

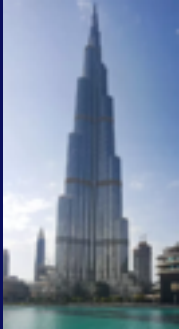

2. Safely use your bottom step and step up and down to complete the distance with an incline.

3. Find a safe hill in a park/countryside, measure your steps/distance and walk up and down until you reach the top floor of the building you have chosen.

Can you climb the worlds tallest buildings?

| Wembley Arch | Eiffel Tower | Central Park Tower EST. 2015 | Shanghai Tower | Burj Khalifa |
|--|--|---|--|--|
|  |  |  |  |  |
| 133m | 324m | 472m | 632m | 828m |
| 175 steps | 425 steps | 619 steps | 829 steps | 1086 steps |

Bonus challenge - How many steps did you climb? Can you find a famous landmark, mountain, volcano that you would be able to climb with that distance/ measurement?
