15:55 to 16:00	Questions & Close

The 'Mastering the UCAT' (University Clinical Aptitude Test) course has been put together in official partnership with The Royal Society of Medicine – the authority on Medical Education in Europe

The Medic Portal is the sole provider of UCAT preparatory courses for many leading schools, and has been for a number of years

The Medic Portal's full-time team, composed of qualified doctors and industry experts, has put together our UCAT Course over a number of years to provide a proven strategy and methodology to master all sections of the UCAT

The intensive course is designed to be engaging, incorporating interactive software for students to answer questions in real-time and see scores compared to your peers

Attendees come away with a clear idea on how to tackle each section of this difficult aptitude test, and how to manage time pressures and avoid common pitfalls and mistakes

A study of attendees of this course from 2017 indicated 3 things:

In 2017 The Medic Portal taught 10% of all students taking the UCAT globally

The feedback received from attendees was exemplary, with a 99% recommend rate

The course had a measurable impact on results: the average attendee went on to score in the top 20% of marks - 3 deciles higher than the national UCAT average
