

Home Learning

Dear Parents and Carers,

We have set some work for your child to do online whilst they are at home. To access the work you will need to log into the school's DB Primary page. You can find your child's login details in their school diary.

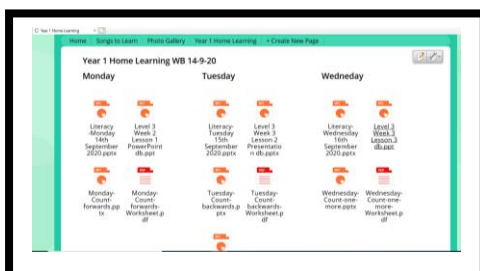

Once your child logs in they will be brought to the below page.

Click on the home learning tab.

You will then be brought to the home learning page. This page will have work set by your child's class teacher. The work will be in line with the lessons the children will be doing in school. You will find a power point for each lesson and the lessons will be divided into the different days of the week.
