# SLCN ADVICE LINE

For Speech, Language and Communication support

If you would like some general advice around helping children's speech, language and communication needs (SLCN) in your setting, pre-book a video or phone call with one of our Specialist Speech and Language Therapists. We can support you with:

- Knowing when and how to refer a child into the Speech and Language Therapy service.
- Recommending resources to identify children who may need support with speech, language and communication skills.
- Advice on next steps with supporting SLCN in your setting.

Please note - these calls are for general information and advice only. We will not be able to discuss specific children during these calls. If you have any questions about children already known to our service, please call our Admin Team on 01274 221166.

Advice line for **preschool age** children.
