

Next week we will be holding a whole school STEM week. STEM stands for Science, Technology, Engineering and Maths. Our theme for the week is going to be Time. Over the week all the children will be taking part in STEM related activities and learning about some people who are famous for their work in the STEM subjects.

We will also be having a very exciting afternoon on Friday 15th March and will be launching Play Projects in our school.

Play Projects is an idea created by Greg Bottrill who we have been lucky enough to be working alongside at school.

*"Ideal for Nursery, Kindergarten, Reception, KSI and into KS2, the concept of Play Projects is firmly rooted in the belief that children are creative, collaborative and can lead their own learning trajectory."*

We need your junk!

To help us launch play projects next week we need lots of boxes, tubes, bottles and all things junk modelling!

Please could any donations be handed to class teachers ready for our first play project on Friday afternoon.

Many thanks.
