

St Mary's Catholic School

Remote Learning Plan for students self-isolating

November 2020

As you will be aware, government guidance requires schools to have a remote learning plan in place so that any child who cannot attend school because of COVID-19 does not miss out on their learning. Of course, at St Mary's we are fully committed to providing remote education for those students at home. We want to ensure that if your child is self-isolating, he/she does not fall behind with his/her work and is able to keep fully on track with other children in school.

Of course, if your child is unwell, naturally, he/she will not be expected to complete work at home. Your child will be able to catch up with work, as always, when fully recovered and back in school.

The government guidance also makes very clear that there are many forms of effective remote education and schools can choose which types of remote learning to use. This may include the use of online resources such as PowerPoints and worksheets, providing printed resources or textbooks for students to use at home, using video or audio recordings to support learning, providing live-streamed lessons, using online communication with students and using online assessments and homework.

At St Mary's, we are currently using a variety of methods to ensure excellent remote education for any students self-isolating, fully in line with government guidance. For your information, this includes:

- Providing students at home with lesson resources on Microsoft Office 365/Teams for all lessons they would normally have during the school day. For students in Years 7 to 11, this will usually be 5 hours of lessons per day and for our Year 12/13 students the number of lessons will vary as per their timetable, with most students having 3-5 hours of work per day and further time being used for independent study as normal.
- Lesson resources are uploaded onto Teams by the end of each timetabled lesson, therefore, if your child usually has an English lesson 9.00am-10.00am on a Tuesday, the appropriate lesson resources will be on Teams by 10.00am on that day. This is so teachers can ensure that students working at home are at the same point as students working in school, given that by the end-point of each lesson, teachers know how much work has been covered.
- We recommend that students follow their timetable as closely as possible at home, to help them structure their work and manage their time effectively. However, we fully understand the difficulties that students may face whilst working at home, therefore, they should just do their best to complete their normal lessons each day. Thankfully, a self-isolation period is two weeks maximum, therefore, once back in school, students will be supported as always, to ensure they are on track.
- Online resources may include PowerPoints, worksheets, links to other websites, video clips, audio recordings, assessments, homework tasks etc.
- Online lesson resources are provided by your child's subject teacher, if your child is self-isolating. The teacher will know your child's teaching group well. Therefore, as with lessons in school, the lesson resources will be appropriate for the academic ability of the students in the class, thereby providing an appropriate level of work for students at home.
- Lesson resources will include additional explanation as appropriate, to further support students working at home. This explanation may be via additional written explanation on resources for students at home and/or further explanation using audio or video recordings.

- Students are able to use the 'Chat' facility on Teams to ask their teachers individual questions about their work. Teachers will either respond to students online during the school week to answer questions or, if your child is due back in school within a couple of days, the teacher may instead chat to the student in their next lesson. Of course, some questions may not be urgent and therefore, students can save these questions until they are back in school.
- Teachers are also able to use the 'Chat' facility on Teams to contact individual students if they have not completed work or homework. Any missing work can also be followed up in school, as always.
- Teachers and students are also able to use the 'Posts' facility on Teams, to allow Teachers to communicate messages and further guidance regarding the subject work to the entire teaching group.
- If any assessment is planned in school, the assessments can also be completed on Teams for those self-isolating and teachers are able to share feedback on work via Teams, if appropriate.
- All Homework for students in school and for those self-isolating, is also completed via Teams. We have been doing this since the start of term to reduce the amount of resources that are transferred between home and school.
- For any students without IT access at home, hard copy resources will continue to be provided for their remote education at home. Please speak to your child's Head of Year should this be required and we will ensure work is provided.
- For any students with a Special Educational Need or Disability, the SEND team will continue to offer additional support where needed, with Learning Support Assistants working with families to ensure all students with SEND can successfully access remote education.

Of course, as soon as your child returns to school following their short period of self-isolation, teachers will also review progress with him/her to ensure that your child is on track with their work.

We believe that the above provision provides high-quality remote education for students self-isolating at home. There are no plans at present to introduce live-streaming of lessons at St Mary's. As outlined, students will continue to receive effective teacher input and explanation via a variety of lesson resources, written instructions and/or audio and video recordings. Students will also be able to continue to interact with teachers via Teams whilst at home, if necessary.

We will continue to regularly evaluate our remote learning provision, as we do with all aspect of teaching and learning in school. We will keep you updated regarding any changes.

If you have any questions about any aspect of this as we move forward, please get in touch with your child's Head of Year in the first instance. Mr McKeating, Assistant Headteacher, can also be contacted if necessary, as he leads on teaching and learning in school. Many thanks.
