

Studying at Home

This booklet has been designed to support you as you learn at home

Top Tips for Learning at Home

KEEPING MOTIVATED

Set yourself goals each day.

Work towards completing a task.

Ask those around you to get involved in your learning.

Keep in touch with others who are in the same situation.

Researchers have found that a minimum of at least 20 minutes a day of any physical activity can create a positive mental attitude.

Top Tips for Learning at Home

STAYING FOCUSED

For every 50 to 60 minutes of study time, plan a 10 to 15-minute break.

When taking a break, get a healthy snack for an energy boost, be active and take a short walk, or listen to music.

Schedule time for additional learning when you are at your most focused and alert. For example, you might find that you retain more information during the morning.

Top Tips for Learning at Home

PLANNING YOUR TIME

Think about your learning style – do you prefer to work in short bursts or over longer periods?

Plan how much time you need for the work set in each subject.

Evaluate your plan every few days – is it still working and keeping you busy?

Top Tips for Learning at Home

SETTING REALISTIC EXPECTATIONS

Learning at home is very different to being at school, accepting that there are more distractions is important. Managing these distractions and keeping them to a minimum needs to be part of your daily planning.

Studying on your own, for long periods of time, can become tedious – make sure that you are having regular breaks.

Learning at home, to this extent, isn't something you've ever had to do before, so be kind to yourself and allow time to get used to the new learning routine.

Top Tips for Learning at Home

REWARDING YOURSELF

Having a cup of tea or coffee.

Eating your favourite healthy snacks.

Watching television during your breaks.

Chatting to friends online during your breaks.

Reading a chapter from your favourite book.

Flora - Focus Habit Tracker

It's important to take breaks and reward yourself for your hard work. There are also apps that help you put your phone down and reward you for remaining focused.

Top Tips for Learning at Home

CREATING THE PERFECT WORKING ENVIRONMENT

Get started early – pretend you are going to school (try not to stay in your pjs!).

Take regular breaks!

Follow a structured day (see diary planner).

Have a quiet space with few distractions.

Choose a workspace that is comfortable.

Try to work in a cool, bright space.

Limit your social media time (use it as a reward!).

Aim to sit at a desk in a comfortable chair.

LOOKING AFTER YOUR MENTAL HEALTH

Talk about your feelings – this isn't a sign of weakness, it's part of staying healthy.

Keep active – regular exercise can help you concentrate, sleep and feel better.

Keep in touch – try not to isolate yourself, catch up with friends on the phone or spend time with your family.

Ask for help – we all sometimes get tired or feel overwhelmed. If things are getting too much for you, ask for help.

Take a break – a change of scene is good for your mental health. It could be as simple as a five-minute walk around the garden!

Eat well – your brain needs lots of different vitamins and minerals to stay healthy and function well.

ADVICE FOR PARENTS

- Regardless of your child's age, it is important to have a schedule for them during their additional time at home. Educators recommend providing structure to each day by allocating time to different activities and sticking to this on a day-to-day basis.
- Home learning doesn't mean that you have to be the teacher. Use the things available to you, such as work sent by the school or the many online free resources.
- Try to fit exercise into the daily routine. If outdoor activity isn't an option, there are many workouts or yoga classes for young people available on websites such as YouTube.
- Your child will still need to socialise with their friends and peers. If this is not something they can do face to face, then it is important to allow them time to chat to friends on things like Facetime for example. If you are concerned about their time spent online, the following organisations can provide useful advice.

FOODS TO BOOST YOUR BRAIN

Many foods can help keep your brain healthy. Some foods, such as fruits and vegetables, as well as tea and coffee, have antioxidants that help protect your brain from damage. Others, such as nuts and eggs, contain nutrients that support memory and brain development.

- Fruits and berries – Apples are high in fibre and vitamin C. They make the perfect snack if you are hungry between meals.
- Strawberries are highly nutritious and low in both carbs and calories.
- Nuts and seeds – Almonds are loaded with vitamin E, antioxidants and fibre.
- Vegetables – Carrots are full of fibre and vitamin K and make a quick, preparation-free snack.
- Broccoli contains a decent amount of protein compared to other vegetables.
- Potatoes are loaded with potassium and contain a little bit of almost every nutrient you need, including vitamin C.
