

# NOVA STUDIOS

The top section of the image shows a stage setup for NOVA Studios. The background is a large wall with a vibrant, abstract geometric pattern in shades of purple, pink, and blue. Several large monitors are positioned around the stage, each displaying the NOVA Studios logo. In the foreground, there are several modern, light-colored armchairs arranged in a semi-circle, suggesting a lounge or interview area. The overall atmosphere is professional and modern.

## ABOUT NOVA STUDIOS

NOVA Studios is Norway's largest streaming studio. It can be used for many types of conferences. Concerts, lectures, courses, product demo, panel discussion, podcast / video. You can invite to a physical and digital meeting place and connect several meetings.

## FLEXIBLE

With adjustable design, the studio can be adapted to your brand. Our 3 stages can be used for different purposes and streams. Our premises are flexible, and we have a wide range of interiors that allow you to get your desired "look" at the event.

## STREAMING AND AUDIENCE

Live production with space for 200 people in the hall (or more if restrictions allow), at the same time as 6 cameras, AV rig and streaming production enables an unlimited number of digital participants.

A physical and digital event gives better availability and quality.

**Do you have ideas for an event and are wondering if we can make it work together? Don't hesitate to contact us for a price request and more information. We can tailor the solution to your needs!**
