

# Amazingly Comfortable

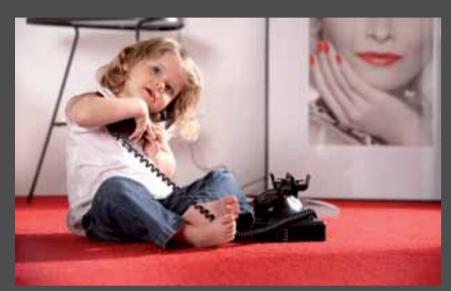

Comfortable
Stain protected
Easy care
Sustainable

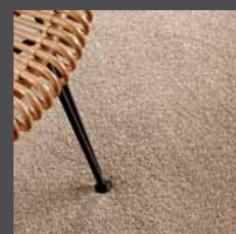

## Just amazing ...

Prepare to be amazed by this revolutionary new flooring, made from 37% renewable corn sugar, with unprecedented benefits and features. AMAIZE® will definitely change the way you think about carpet. You will discover a new meaning of comfort, stain protection, easy care and sustainability.

# Amazingly Comfortable Soft touch surface

AMAIZE® carpets provide comfort to spaces in many ways. Thanks to the properties of AMAIZE®, carpets take on a silk lustre and are extraordinarily soft to touch, bringing homes flooring that indulges the senses. With high pile weights (990 - 1870g/m²) that create dense surfaces, AMAIZE® carpets invite you to relax, providing superior levels of underfoot comfort and the ultimate in luxury.

What's more, the ecological AMAIZE® fibre contributes to carpets that deliver the best in insulation, helping to make spaces warmer, quieter and calmer.

### Amazingly ...

- soft and luxurious
- comfortable underfoot
  - warm and quiet

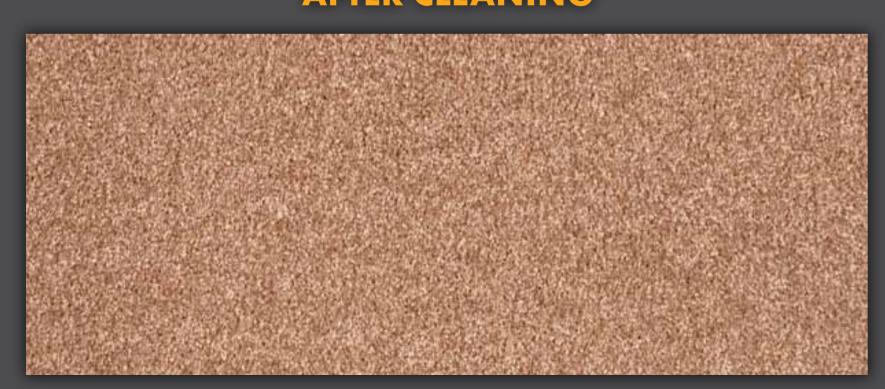

## **BEFORE**

## **AFTER CLEANING**

# Amazingly Stain protected 5 years warranty

What an amazingly stain-free carpet! As a natural feature of the yarn, AMAIZE® carpets provide built-in stain protection that will never wear off or wash away!

With other unprotected textile carpet fibres, if a spill occurs the stain is absorbed and specialist cleaning products are needed to remove it, yet even with these the results are not always ideal.

AMAIZE® is different. The yarn does not absorb the colour of the spill in question and even persistent stains can be easily removed with bleach without loss of colour. That's why every AMAIZE® carpet comes with our full five year warranty against household stains.

Amazingly ...

- well protected against stains
- durable and resistant
- bleach cleanable

# Amazingly Easy care no worries

When you choose AMAIZE® carpets, you choose quality, easy maintenance and a carpet that doesn't absorb dirt or dust. That's why AMAIZE® carpets are so easy to look after. All you need to do to keep your AMAIZE® carpet looking good as new is to vacuum once a week and carry out a wet clean every two years. If stains do occur, simply clean them away with some water, easily available household products\* or bleach.

The weekly maintenance of your carpet is very important to keep it looking new and for prolonging its life. We recommend using a vacuum with a beaterbar or a rotating brush as these 'lift' the pile to remove more soil and make it easier to remove dirt and dust.

We also recommend that you wet clean the carpet every two years; vacuum thoroughly and then use a good quality spray extraction appliance to apply carpet shampoo and extract it immediately.

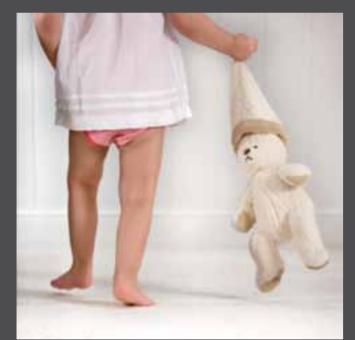

### Amazingly ...

- resistant to dirt and dust
  - easy to maintain
  - easy to wet clean

\* please consult the AMAIZE® brochure for more details on recommended maintenance products.

## Amazingly Sustainable

Made from 37% renewable corn sugar

### This is truly amazing!

AMAIZE® carpets finally bring spaces a more sustainable flooring solution. AMAIZE® carpets are made from 100% triexta AMAIZE®, a polymer that is made from 37% rapidly renewable corn sugar.

Yet this isn't the end of the ecological story. The manufacturing process of AMAIZE® yarns consumes 30% less energy and reduces CO2 emissions by up to 60%, helping to preserve the planet for future generations. The AMAIZE® carpets themselves are produced with green energy from ITC's solar panels installed on the factory roof reducing CO2 emissions even further. Moreover, the pile of the AMAIZE® carpets is a thermoplastic material that can be sheared, reprocessed and extruded to palets for new carpet fibres or other applications.

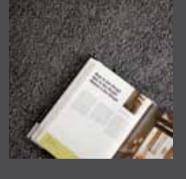

Not only are AMAIZE® carpets great for the environment, they are also full of natural in-built stain-protection as well as providing the best in durability and longevity.

### Amazingly ...

- sustainable made from 37% rapidly renewable corn sugar
- energy efficient 30% less energy consumed during production
- low emissions up to 60% reduction in CO2 emissions during production

## **EINSTEIN**

Einstein offers a twist pile aspect with a heather look. The harmonious range with trendy shades of brown and beige. A selected pallet to fit various decoration styles.

Made from the triexta AMAIZE® fibre, Einstein is stain protected, easy to maintain, antistatic and certified as suitable for Allergics.
