Clubrooms: 6 Baker Street, Hawick, TD9 9BW

Head Coach Vacancy - Season 2021/22

About us:

Hawick Harlequins are a senior rugby team currently playing in the Scottish East Region Division One League. The club also competes in the annual Border Shield competition, with the chance to progress into the National Shield competition. In recent seasons, we have made the final of the National Shield and won the East Region Division One Title so the aim of the club again is always to compete at the top end of the table and progress to the latter stages of the knockout competition.

We have a tight knit playing squad that rarely exceeds 25 players but generally have a few players out with this group willing to pull the boots on. Playing age and ability varies, we have players who have plied their trade in the premiership with Hawick and young players coming through the ranks from Hawick Youth - generally, the club welcomes players of all abilities. The progression of young players to move on and play at a higher level has always been important to the club and remains a key aim for the future.

Requirements:

We hope to recruit an enthusiastic coach who can run training sessions, which accommodate players that are more experienced and help progress the younger players. Training nights are flexible, but we would require commitment to two sessions per week in the evenings, with the coach being required to attend home games and travel to away games. The coach is welcome to bring in their own assistants however, there are senior players and ex-players around the club always willing to help if required.

The club would prefer a coach with previous experience however, this may be an opportunity for any players looking to step into coaching for the first time. Coaching badges are desirable but not essential and if the candidate would like to progress their coaching by gaining the relevant badges the club are willing to assist with this.

Payment options can vary depending on level of involvement and experience but are negotiable.
