

# Ibis

A world leading, ultra-low profile roof top air conditioner designed for vans of all types to operate in the most rugged conditions.

## Heat Pump with extra low profile

The Ibis provides both heating and cooling as well as filtered and dehumidified air.

Its chassis and canopy are full one piece urethane mouldings which form a rock solid monocoque structure. The Ibis is now the unit of choice for the US Navy and Coast Guard Patrol Boats, Australian military landing craft and Singapore and Hong-Kong Water Police.

Its ultra low profile ensures less drag when towing and greater clearance under your carport or garage.

Because of all its advantages, the Ibis is also an excellent heat pump for industrial applications.
