

# Chatbot 1.1

## Setup

The chatbot is configured through a JSON file which specifies the behavior of the overall experience. Follow these steps to start configuring your chatbot:

1. Create a new JSON file with the configuration found on this page. You can set whatever name you want to the file, but it must have the `*.json` extension.
2. Send this JSON file to your dedicated Customer Success Manager so they can set it up.
3. If your company manages their own script, your Customer Success Manager will send you a URL. Copy and paste it to the `configUrl` property in the API configuration.

## Root properties

List of properties defined in the root of the configuration file. These properties specifies general specs or behaviors of the chatbot.

Name	Description	Required
<b>version</b> string	States the version of the file. The increment of the first value implies file changes that don't have backward compatibility, while the increment of the second value indicates file changes while maintaining backwards compatibility.  <b>Value:</b> an existent version name, i.e. "1.0"  <i>added in V1.0</i>	Mandatory
<b>client</b> string	Identify the Customer who owns this chatbot.  <b>Value:</b> an existent customer UUID.  <i>added in V1.0</i>	Mandatory
<b>chatbotId</b> string	Identify the chatbot with a name.  <b>Value:</b> an existent chatbotId to update the chatbot configuration, or new name to create a new chatbot.  <i>added in V1.0</i>	Mandatory
<b>launchNode</b> string	Specify the first node to be launched when the chatbot starts.  <b>Value:</b> an existent node identifier.  <i>added in V1.0</i>	Mandatory
<b>seeds</b> <a href="#">seeds</a>	Set all the available seeds for the chatbot. Use them to redirect the user to one team or another.  <i>added in V1.0</i>	Mandatory
<b>nodes</b> <a href="#">node</a>	Object containing all the nodes.  <i>Added in V1.0</i>	Mandatory

## Seeds

By default, the session will start with the seed that you have configured as `primarySeed`, or as `secondarySeed` if you start a One-to-One from a One-to-Many. If you want to redirect the customer to a different seed depending on their answers, you can configure different seeds, with different teams on each one. Give a unique string key to each `configSeed` object to later link a node to it.

Name	Description	Required
------	-------------	----------

<b>seed</b>	Id of an existent seed.	Mandatory
string	<i>Added in V1.0</i>	

## Example

```

"seeds": {
  "mobileTeam": {
    "seed": "58107f8c-c930-453b-a253-d63b165c3a62"
  },
  "internetTeam": {
    "seed": "d4ff7a14-fdf2-45c2-9e87-074c7d841c77"
  },
  "televisionTeam": {
    "seed": "45c2a987-2588-482b-a437-bf04f25b4a1f"
  }
}

```

## Nodes

A node represents a single interaction between the chatbot and the customer. It may be a question with options, an input asking for some data, a simple text...

The nodes live within the `nodes` property. They are defined as a string key (which has to be unique) along with a JSON object with the node internal properties.

The `type` property indicates the behaviour and look of the node.

## List of types

- `message_button`: This type of node makes a text message to appear followed by one or more buttons.
- `message_session_data`: Group of data that will be asked to the customer in order to configure the session that will be launched.
- `message_simple`: A simple message shown to the customer.
- `message_link`: A node with a set of clickable links.

## Types

### message\_button

This type of node makes a text message to appear followed by one or more buttons. We recommend to use this type of node to ask the customer to select an option from the ones displayed.

Name	Description	Required
<b>type</b>	<b>Value:</b> message_button	Mandatory
string	<i>added in V1.0</i>	

<b>text</b> string	Text of the message. Use this property to ask the question that the customer must answer. <i>added in V1.0</i>	Mandatory
<b>options</b> option [ ]	Possible options displayed to the customer, which will be presented as buttons. We recommend not to display more than 6 options. <i>added in V1.0</i>	Mandatory

### message\_button - option

Name	Description	Required
<b>buttonText</b> string	Text of the button. We recommend not to exceed 35 characters. <i>added in V1.0</i>	Mandatory
<b>seed</b> string	Id of a configured <a href="#">seed</a> . When the customer clicks on this button, the session will be configured with the provided seed. <i>added in V1.0</i>	Optional
<b>action</b> string	Id of a configured <a href="#">node</a> to make a new chatbot interaction appear, or "start" to initiate a session with an agent. If the customer has already filled an input_phone it will be a voice call session. If not, it will only be a chat session. <i>added in V1.0</i>	Mandatory

### message\_session\_data

Group of data that will be asked to the customer in order to configure the session that will be launched.

Name	Description	Required
<b>type</b> string	<b>Value:</b> message_session_data <i>added in V1.0</i>	Mandatory
<b>buttonText</b> string	Text of the button. <i>added in V1.0</i>	Mandatory
<b>action</b> string	Id of a configured <a href="#">node</a> to make a new chatbot interaction appear, or "start" to initiate a session with an agent. If the customer has already filled an input_phone it will be a voice call session. If not, it will only be a chat session. <i>added in V1.0</i>	Mandatory
<b>fields</b> field [ ]	Set all the fields for this form. <i>added in V1.0</i>	Mandatory

### message\_session\_data - fields:

#### message\_session\_data - field - input\_phone

Use this input to ask for the customer's phone.

Name	Description	Required

<b>type</b> string	<b>Value:</b> input_phone <i>added in V1.0</i>	Mandatory
-----------------------	---	-----------

### message\_session\_data - field - checkbox\_private\_policy

Use this input to ask the customer to check the privacy policy.

Name	Description	Required
<b>type</b> string	<b>Value:</b> checkbox_private_policy	Mandatory

### message\_simple

A simple message shown to the customer.

Name	Description	Required
<b>type</b> string	<b>Value:</b> message_simple <i>added in V1.0</i>	Mandatory
<b>text</b> string	Text of the message. <i>added in V1.0</i>	Mandatory
<b>action</b> string	Id of a configured <a href="#">node</a> to make a new chatbot interaction appear, or "start" to initiate a session with an agent. If the customer has already filled an input_phone it will be a voice call session. If not, it will only be a chat session. <i>added in V1.0</i>	Mandatory

### message\_link

A node with a set of clickable links.

Name	Description	Required
<b>type</b> string	<b>Value:</b> message_link <i>added in V1.1</i>	Mandatory
<b>text</b> string	Header text of the node, use it to provide a description about the subsequent links. <i>added in V1.1</i>	Mandatory
<b>action</b> string	Id of a configured <a href="#">node</a> to make a new chatbot interaction appear, or "start" to initiate a session with an agent. If the customer has already filled an input_phone it will be a voice call session. If not, it will only be a chat session. <i>added in V1.1</i>	Mandatory
<b>links</b> <a href="#">link</a> [ ]	List of links to show. <i>added in V1.1</i>	Mandatory

### message\_link - link

Name	Description	Required
------	-------------	----------

<b>linkText</b> string	Visible text of the link.	Mandatory
<b>linkUrl</b> string	Target URL of the link.	Mandatory

## File example

This example shows how to set a chatbot meant for sales, that begins with a filter to distinguish between clients and everyone else.

The customers that are clients will receive a suggestion to call to the customer care service.

The customers that are not clients will be asked how they prefer to talk, via phone or chat. If they want to talk via phone, they will have to provide their phone number and accept the privacy policy before starting the session with an agent. Both kind of sessions will be redirected to the default seed.

### chatbot.json

```
{
  "version": "1.0",
  "client": "6b4ae9d1-3f71-43de-9981-683aaa128748",
  "chatbotId": "salesService",
  "launchNode": "welcomeMessage",
  "nodes": {
    "welcomeMessage": {
      "type": "message_simple",
      "text": "A few more details will help get you to the right
person",
      "action": "clientFilter"
    },
    "clientFilter": {
      "type": "message_button",
      "text": "Are you already a client?",
      "options": [
        {
          "buttonText": "Yes, I'm a client",
          "action": "customerCare"
        },
        {
          "buttonText": "No, I'm not a client yet",
          "action": "setSessionType"
        }
      ]
    },
    "customerCare": {
      "type": "message_simple",
      "text": "Please contact with our Customer Care service
calling to 900 123 456. Thanks!"
    },
    "setSessionType": {
```

```
    "type": "message_button",
    "text": "How do you want to talk?",
    "options": [
      {
        "buttonText": "Chat",
        "action": "chatConfirmation"
      },
      {
        "buttonText": "Phone",
        "action": "phoneMessage"
      }
    ]
  },
  "chatConfirmation": {
    "type": "message_simple",
    "text": "Great! You will be attended in a moment",
    "action": "start"
  },
  "phoneMessage": {
    "type": "message_simple",
    "text": "Provide your phone number so that one of our experts
can call you",
    "action": "telcoForm"
  },
  "telcoForm": {
    "type": "message_session_data",
    "buttonText": "Connect now",
    "action": "start",
    "fields": [
      {
        "type": "input_phone"
      },
      {
        "type": "checkbox_privacy_policy"
      }
    ]
  }
]
```

```
}
}
}
```

This example shows how to set a chatbot that redirects the customer to one seed or another depending on their responses, to find the expert that better match their needs. Then the customer will be attended by an agent on a One-to-One session with a phone call.

First the seeds are configured and identified.

Then the chatbot asks the customer a question, and each response sets a different configured seed.

Then the chatbot asks the customer to provide their phone number and accept the privacy policy. Once the customer clicks on "Connect now", the customer will receive a phone call and the session starts.
