# THIS *is* HOLDIT

---

In 2007 Apple launched the iPhone and completely changed our relationship to smartphones, the Internet and how we interact with others. The standard mobile phone became smart and a natural part of daily life. This is what gave birth to Holdit – to simplify our digital life and introduce a touch of personality.

Thanks to carefully selected suppliers and designers and relying on efficient logistics solutions, Holdit offers a range with continuous product updates that respect the user requirements on design and function. Few suppliers are able to match our speed and flexibility in bringing custom-designed products to market.

Holdit is supported by Proove – a family enterprise with long-established roots on the Swedish west coast, where basic values such as simplicity and informality permeate how we interact both in business and daily life. Over 20 years, Proove has become an established supplier of illumination products and electric and electronic solutions for smart homes.

Today Holdit is the leading supplier in Scandinavia in its market segment and enjoys increasing growth in international markets. Together we create unique products and venture into new exciting business prospects.

*Welcome to Holdit.*

## THIS IS CATHARINA

---

Name: Catharina Andersson

Age: 38

Family: Husband and three children

Home: Varberg, a city on the Swedish west coast

Biggest interest: Travel

Favourite colour: Black base contrasted by pink colours

Favourite country: Hong Kong (for work) and  
anywhere in the West Indies (vacations)

Favourite fashion statement: Elegant robust

Favourite design: Among Swedish design, Acne,  
Hunky Dory and H&M. My international design  
favourites are Marc Jacobs, Michael Kors and Jimmy Choo.

---

# IT ALL *starts with* AN IDEA

---

I love accessories! Bags, shoes and jewellery that enhance individual personalities provide inspiration to me. I like to give the same feeling in return through my design.

Much of my inspiration comes from travels overseas on business trips and vacations. Meeting others and discovering new cultures and styles arouse my curiosity and drive my creative zest.

I believe my design style can be summed up as "Scandinavian" spiced up with international elements. I love the form of a square. Even when something is round, I want to give it an edge where one can rest the eyes, preferably somewhat strong and robust. I like to use patterns straight from nature, e.g. those from animals and plants, and I often use them as elements of expression in my designs.

The greatest challenge in this line of work is the hunch and intuition required to know which design to apply for a given product. To pinpoint the right design and element of expression, you must always keep up with trends and gain know-how about different target groups.

When talking about target groups, I truly believe Holdit has something for everyone. So if you ask me "Who are the target groups of Holdit", the answer is simple: "A lot of different people", because I can't point to anyone specific and I can't leave anyone out. This might be one of the keys to the success of Holdit - when you have a mobile or tablet and want to express your personality, you'll surely be a proud owner of a Holdit design product.

*Catharina Andersson*

# WALLET CASES EXTENDED

Sometimes you have more than two credit cards. That is why we created the extended wallet case. These models have six card slots, a larger pocket for bills and a pocket with a plastic window for your driver's license or some photos of your dear ones.

The plastic phone holder is carefully designed to fit the phones perfectly. All buttons and ports are available without removing the phone from the holder.

These wallet cases are available in a wide variety so both businessmen as well as trendy women (and everyone in between) will find a model that they will proudly use.

# WALLET CASES EXTENDED II

Meet the newest innovation in the wallet case family. We have kept the basic function from the Extended Wallet Case, like room for up to six cards. But this model has even more built-in functions. We have included a magnetic button to keep the flip pocket securely closed when opening the case. And to keep this model even slimmer, we have removed the plastic pocket. The back side of the flip pocket is now completely flat.

The plastic phone holder is carefully designed to fit the phones perfectly. All buttons and ports are available without removing the phone from the holder.

This is the perfect companion for your phone and will fit both men and women equally good.

# WALLET CASES MIRROR

The recipe of a good innovation is to take two good things and combine them into one. We think our wallet case with a mirror is such an innovation

This is the ultimate wallet case. It has six credit card slots, a large pocket for bills and a built-in mirror.

So no matter you want to check your make-up, send some Morse code or check out that cute person behind your back at the bus - this is the wallet case to choose.

Here we show our range for iPhones and Galaxy S5, but other models might be available upon request.

# WALLET CASES WITH SUCTION CUPS

These wallet cases are created to fit the 90+ most common smartphone models. They are neat and protective and fit perfectly with most smooth backside phones and are as easy to remove and attach, as they come. The numerous silicone suction cups are easy to rinse and are as durable and firm as they come.

They have three card slots for your credit cards as well as a larger pocket for bills. The suction cups will hold your phone in to place perfectly.

QUICK-SNAP MAGNETIC SYSTEM

# WALLET CASES MAGNET

Is it a wallet case? Is it a phone shell? Actually, it's both! Sometimes it is more convenient to just use the phone without the wallet. For these moments you just remove the phone from the wallet case. The phone is still protected on the back side by the shell.

When your are done talking, you just snap it into place and the phone is fully protected again.

# WALLET CASES EXTENDED II + MAGNET

Well, you know us. We never stop thinking about smart combos. Here is a new one. We combined the new Extended II model with the old Magnet case, and voila! the new model was born.

In this version of the Extended II case you can remove the plastic holder. This makes it easy to use your phone and when you are done talking, you just snap the phone back to its case and it is fully protected again.

The magnet is especially approved in order not to demagnetize your credit cards. But it is still strong enough to safely keep your phone in place inside the wallet case.

# SPORTS-WEAR

Holdit sportswear are made with the user in mind. Every item is made of high quality materials that will last for a long time of use. All items are easy to adjust and use. We have implemented many details that is useful and adds an extra value. For example, some models have a small pocket where you can put the key to your home or your car. And some models have a cable holder so your headphone cable won't tangle up while you are exercising. We think it's quite smart!

Phone holder with magnetic function. Attach it to the windscreen or the dashboard with the extremely strong suction cup. Then just snap your phone to the magnetic holder. Use it with the included metal plate or sticker.

The 360 rotation magnet holder is a member of our Quick Snap Magnet family system. So you can easily use our Metal Backside Case or the case in our Wallet Case Magnet and Extended II + Magnet.

---

# STYLISH PRODUCTS AND ATTRACTIVE PACKAGINGS INCREASE SALES

---

We constantly work hard to reduce our environmental footprint. One step is to reduce the packaging material to a minimum. This means smaller cartons which in turn means less freight volume. Less CO<sub>2</sub> per unit and less waste in all steps of the supply chain is a great benefit.

To reduce the necessary packaging material but still withhold our brand strategy and a nice presentation in the store might be a challenge. But we have made a good job so far and we look for opportunities to get even better in the future.

All our packaging material is recyclable.

---

## A FEW WORDS ABOUT OUR PACKAGING STRUCTURE

---

📦 = Quantity in inner packaging

📦 = Quantity in outer packaging

We have chosen to have a rather small quantity in both inner and outer packaging. The quantity in the inner packaging is often adapted to the length of the shelf pins in the store. Most pins can only hold 5 items and if the inner packaging holds more than that, you have to store items in an open packaging. With our quantities you can instead keep your stored items in closed packagings.

You can see underneath each item in this catalogue the quantities in both inner and outer packaging. This makes it easy for you to order correct quantities from the beginning.

---

# POWERFUL AND FLEXIBLE DISPLAY SOLUTIONS THAT ENHANCE YOUR STORE'S LOOK

---

Along with Holdit's new packaging design, we also offer flexible and attractive display solutions that lift your store and your sales.

A homogeneous exposure becomes an extension of the packaging design and gives your store a professional impact. It creates credibility and enhances the customer experience and the ability to move the products from the shelf to the shopping basket.

Contact us to find a good solution for your store environment.

CUSTOM  
MADE  
DISPLAYS

**Holdit Display Large**
