OPTICAL INSTRUMENTS SINCE 1913

NUREMBERG/DE

1913

On 15 November Josef Eschenbach establishes the company named after himself with the objective of setting up a wholesale business for optical articles and technical drawing instruments.

1990

The Museum of Modern Art in New York awards the „club®“ binoculars – the first binoculars of their kind – a place in its permanent exhibition.

1990

The network of established distribution offices in Austria, Switzerland and the USA has been successively increased to 12 today with the objective of providing trade and consumers with optimum service.

1950

Rudolph Eschenbach demonstrates his global vision: in addition to production in Nuremberg, he was one of the first German companies to import binoculars from the Far East in the 1950s.

2007

Barclays Private Equity is acquiring the Nuremberg-based Eschenbach Group together with the company's management. The previous owner Hannover Finanz and the family of Gerd Eschenbach are surrendering all their shares. The family of Walter Eschenbach will retain its shares in the company.

1999

Hannover Finanz, one of the most prestigious German equity investment companies takes shares in the company. The Eschenbach family hands over operational management to outside managers who also invest in the company.

2009

Tura and Eschenbach Group to merge. Tura has been active on both the U.S. and Canadian markets for more than 70 years as one of the top providers of eyeglass frames and sunglasses.

2014

For more than 15 years, Eschenbach Optik has been market leader for spectacle frames in Germany and one of the leading suppliers in Europe, world market leader for optical vision aids and market leader for long range optics products sold by opticians.

nature

farlux® *SELECTOR D*

THE FIRST CHOICE FOR HUNTERS,
ORNITHOLOGISTS AND DISCERNING NATURE LOVERS

- True-to-life images: The special "naturebright" coating ensures exceptional true colour, bright and high contrast image reproduction.
- Perfect brilliance: Thanks to phase-corrected BaK-4 high-reflection prisms, the farlux® *SELECTOR D* provides an optimal viewing experience with exceptionally high resolution.
- A tough performer: The magnesium housing means that the farlux® *SELECTOR D* is not only lightweight but also exceptionally impact resistant and durable.
- Weatherproof: Water pressure proof (5 min. at 1 m water depth) and nitrogen gas filled.
- Spectacle eyepieces afford an optimal field of view even when wearing (sun) glasses.
- Stable tripod thread ensures shake-free viewing pleasure at all times.
- Accessories: Comfortable neoprene carrying strap, high quality case, wooden storage box, convenient dust protection caps.

farlux® *SELECTOR D*
8.5 x 45 B
Item No. 4274845

farlux[®] SELECTOR V

POWERFUL ZOOM BINOCULARS WITH BEST VIEWING COMFORT FOR BIRD WATCHING AND DAYTIME HUNTING.

- Bright, brilliant images thanks to an optimal combination of phase-corrected high reflection SK15 and BaK-4 prisms whose coating enhances image brightness by around 8%.
- True-to-life colours: As a result of the "naturebright" coating, light transmission in the spectral range is optimised by green light.
- Best possible zoom characteristics: Even at 15-times magnification the farlux[®] SELECTOR V shows a consistently bright image free from "tunnel vision" and can be easily used even in damp conditions.
- Lockable dioptre balance located on the centre adjustment wheel prevents unwanted movement.
- Ergonomic grip: The farlux[®] SELECTOR V can be held firmly and securely even during lengthier observations.
- Spectacle eyepieces afford an optimal field of view even when wearing (sun) glasses.
- Stable tripod thread ensures shake-free viewing pleasure at all times.
- Accessories: Carrying strap, high quality case, storage box, convenient dust protection caps.

farlux[®] SELECTOR V
8 – 15 x 35 B
Item No. 42741

farlux® F-B *silver*

A PERFECT COMBINATION OF COMPACT FOLDABLE DESIGN AND HIGHEST OPTICAL QUALITY.

- Maximum brightness and high colour accuracy: Thanks to the “naturebright” coating, the high quality lenses are able to transmit up to 93% of the light and guarantee exceptionally brilliant, true colour images.
- Brilliant images: Phase-corrected BaK-4 high-reflection prisms ensure optimal viewing experiences.
- An “anti-raindrop” coating prevents water marks on the lenses and makes cleaning simple.
- Compact foldable design: Quickly stowed in any bag, the farlux® F-B *silver* is the perfect companion for every outing.
- Suitable for spectacle wearers thanks to the retractable eyepieces. Individual distance adjustment is possible by 2-step click-locking of the spectacle wearer eyepieces.
- Nitrogen filled and watertight
- Accessories: Belt bag, protective caps, comfortable carrying strap with neck padding. Supplied in a gift and presentation case.

bison®

THE PERFECT COMPANION FOR OBSERVING ALL WILDLIFE AND NATURE UNDETECTED.

- REALTREE near-natural finish allows the binoculars to almost completely blend into the landscape and prevent disturbing reflections.
- High brightness: Thanks to a lens diameter of 42 mm, the bison® 8 x 42 B offers optimal viewing even when visibility is poor.
- Absolute colour accuracy: The phase-corrected BK-7/BaK-4 prisms and "naturebright" high transmission coating ensure exceptionally brilliant, true-to-life images.
- Ready for any kind of weather: Nitrogen filled and with a watertight jacket, the bison® 8 x 42 B provides a clear view even in adverse weather.
- Compact and robust: The binoculars' ergonomic form allows them to be held firmly in the hand and a magnesium housing makes them extremely robust.
- Spectacle eyepieces afford an optimal field of view even when wearing (sun) glasses.
- Stable tripod thread ensures shake-free viewing pleasure at all times.
- Accessories: Carrying strap, neoprene case, dust protection caps.

trophy® ED

HIGH PERFORMANCE BINOCULARS WITH AN EXTRA WIDE FIELD OF VIEW – PERFECT FOR ANY OCCASION.

- Extra wide field of view: High quality wide-angle optics ensure greater viewing freedom and maximum observational comfort.
- True colour images with excellent stereoscopic depth: thanks to multi-coated high performance lenses of special extra-low-dispersion glass.
- High brilliance from phase-corrected BaK-4 prisms with a dielectric mirror coating
- Extremely robust: High quality metal adjustment wheels and an impact-resistant magnalium housing guarantee sustained observation pleasure.
- Weatherproof because watertight and nitrogen filled.
- Spectacle eyepieces afford an optimal field of view even when wearing (sun) glasses.
- Stable tripod thread ensures shake-free viewing pleasure at all times.
- Accessories: Protective dust caps, comfortable carrying strap with quick-release fastener, high quality carry-case.

trophy® P-B

POWERFUL ALL-ROUNDER WITH A WIDE FIELD OF VIEW FOR OBSERVERS OF WILDLIFE AND NATURE.

- Wide bright field of view thanks to a practical combination of wide-angle optics and a lens diameter of 40 mm.
- Sharp, true colour images due to full multi-coating and BaK-4 prisms.
- Ergonomic form: Shaped thumb recesses allow the trophy® P 8 x 40 B to sit comfortably and securely in your hand, even during prolonged use.
- A tactile central focusing wheel and easy to reach dioptre adjustment knob make for easy operation even while wearing gloves.
- Nitrogen filled and water pressure proof (5 min. at 1 m water depth).
- Spectacle eyepieces afford an optimal field of view even when wearing (sun) glasses.
- Stable tripod thread ensures shake-free viewing pleasure at all times.
- Accessories: Carrying case.

trophy® P 8 x 40 B
Item No. 4237840

trophy® P-B

A CLEAR VIEW IN THE TWILIGHT HOURS:
LIGHT-GATHERING PORRO PRISM BINOCULARS WITH
WIDE-ANGLE OPTICS.

- Wide-angle field of view: Both models offer a bright, wide field of view, which is especially suitable for tracking and observing objects that are moving.
- Bright images even in the twilight hours: Both binoculars offer good vision even under poor light conditions. The especially powerful trophy® P-B 8 x 56 is the hunter's binocular of this series.
- High contrast, true colour images due to a full multi-coating and BaK-4 prisms.
- Ready for any kind of weather since nitrogen filled and water pressure proof (5 min. at 1 m water depth).
- A tactile central focusing wheel and easy to reach dioptre adjustment knob make for easy operation.
- Spectacle eyepieces afford an optimal field of view even when wearing (sun) glasses.
- Stable tripod thread ensures shake-free viewing pleasure at all times.
- Accessories: Carrying case.

trophy® F

HANDY BINOCULARS FOR QUICK OBSERVATION
IN ANY WEATHER CONDITIONS.

- Space-saving: With their practical fold-up design, trophy® F-B binoculars fit easily and quickly in any bag.
- Particularly large field of view due to high quality, wide angle optics
- Very high colour fidelity and exceptional stereoscopic depth due to multi-coated high performance lenses made from special extra low dispersion glass
- Phase corrected BaK-4 prisms with dielectric mirror coating
- Extremely robust due to high quality, metal focusing wheels and magnesium housing
- Full field of view even for wearers of (sun-) glasses through special eyepieces with retractable cups.
- Nitrogen filling prevents misting of the internal optics if the temperature fluctuates.
- Weatherproof due to the watertight housing.
- Practical accessories: Carrying strap, dust protection caps, belt bag.

sektor D

LIGHTWEIGHT ALL-ROUNDER FOR SPONTANEOUS NATURE TRIPS.

- Brilliant, true-to-life colour images thanks to phase-corrected Bak-4 prisms and fully multi-coated lenses.
- Functional design combines a modern look with compact form that lies well in the hand for both quick use and prolonged observation. An open bridge makes focusing child's play, even using just one hand.
- Very light: Thanks to the polycarbonate body, the weight of both models is insignificant at merely 389 and 394 grams respectively.
- Durable robust housing with anti-slip rubber coating.
- Can be used in any weather thanks to a waterproof housing and nitrogen filling that prevents misting of the internal optics if the temperature fluctuates.
- Spectacle eyepieces afford an optimal field of view even when wearing (sun) glasses.
- Stable tripod thread ensures shake-free viewing pleasure at all times.
- Dioptre adjustment with reliable "click-locking".
- Accessories: Carrying strap with quick-release fastener, high quality case, practical dust protection caps.

arena® D⁺

DEPENDABLE COMPANION FOR NEWCOMERS TO
BIRD AND WILDLIFE OBSERVATION.

- Bright, true-to-life images thanks to high quality BaK-4 prisms whose light transmitting capacity is further increased by silvering. A coincident reduction in harmful UV radiation ensures eye-friendly joy of discovery at all times.
- Absolutely watertight and thus suitable for any kind of weather.
- Nitrogen filling prevents misting of the internal optics if the temperature fluctuates.
- Spectacle eyepieces afford an optimal field of view even when wearing (sun) glasses.
- Stable tripod thread ensures shake-free viewing pleasure at all times.
- Accessories: Comfortable carrying strap, bag, protective dust caps.

arena® D⁺ 8 x 32 B
Item No. 4254832

arena® D⁺ 8 x 42 B
Item No. 4254842

arena® D⁺

POWERFUL STARTER MODEL FOR
AN UNSPOILT FAR VIEW OF NATURE.

- High image quality thanks to top quality BaK-4 prisms.
- Exceptionally bright due to a 50 mm diameter lens and additional silvering of the prisms thereby increases their light transmitting capacity.
- Eye-friendly observation since the silvering coincidentally reduces harmful UV radiation .
- Absolutely watertight and thus suitable for any kind of weather.
- Nitrogen filling prevents misting of the internal optics if the temperature fluctuates.
- Spectacle eyepieces afford an optimal field of view even when wearing (sun) glasses.
- Stable tripod thread ensures shake-free viewing pleasure at all times.
- Accessories: Comfortable carrying strap, bag, protective dust caps.

arena® F+

COMPACT COMPANION FOR RAMBLERS AND
NEWCOMERS TO NATURE OBSERVATION.

- Space-saving: Thanks to their practical fold-up design, the arena® F+ binoculars will fit in any rucksack or trouser pocket.
- Brilliant, true colour images due to BaK-4 prisms and full multi-coating.
- Extremely easy to handle: Compact form and anti-slip rubber coating allow both models to lie comfortably and securely in the hand.
- Nitrogen filling prevents misting of the internal optics if the temperature fluctuates.
- Weatherproof due to the watertight housing.
- Practical accessories: Belt case and carry cord.

microlux

THE PERFECT MONOCULAR FOR DEVOUT MINIMALISTS.

- Easy to use: Pressing gently with the finger slides the lens unit out into the viewing position.
- Small size: Can be stowed in any bag quickly and easily thanks to its small size.
- The microlux has many uses and is the ideal companion for viewing nature or visits to the theatre or museum.
- Ideal for use as a pocket magnifier with about 3x magnification by simply turning it round.
- Accessories: Carrying cord and bag.

microlux 4 x 13
Item No. 4294413

microlux 6 x 18
Item No. 4294618

start® Monofold

TINY, LIGHTWEIGHT AND FOLDABLE: SMALL MONOCULAR FOR PORRO PRISM FANS.

- Small dimensions and measures only 70 x 45 x 20 mm when folded flat.
- Excellent image quality from top-notch optics with full magenta coating.
- Due to a short near point, viewed objects already appear razor sharp at a distance of 2 m.
- Impact-resistant plastic housing ensures a long lifespan.
- Accessories: Belt bag.

start® Monofold 8 x 21
Item No. 42928212

club® M

REMARKABLE IN TECHNOLOGY AND DESIGN.

- Intuitive slide focus enables easy operation – trouble-free with just one hand.
- The rectangular panoramic field of view is a real treat.
- Excellent image quality from top-notch optics with full magenta coating.
- A short near point allows observations from a distance of 1.5 m and 2 m respectively.
- Elegant, discreet look thanks to the black rubber casing that also makes the club® M easy to grip.
- Accessories: Carrying cord and bag.

lifestyle

regatta®

STYLISH ELEGANT BINOCULARS FOR DEMANDING INDIVIDUALISTS.

- Optimal colour accuracy: The special "naturebright" coating ensures exceptional true colour, bright and high contrast image reproduction.
- Perfect brilliance: Thanks to phase-corrected high quality BaK-4/BK-7 prisms, the regatta® 8 x 42 B offers an optimal viewing experience with excellent resolving capacity.
- Stylish design.
- Weatherproof at all times because watertight and nitrogen filled.
- Robust and lightweight due to the impact resistant magnesium body.
- Stable tripod thread ensures shake-free viewing pleasure at all times.
- Accessories: Protective dust caps, padded carrying strap, watertight neoprene bag.

club®

THE "LITTLE BLACK NUMBER" FOR MEN.

- Ideal lifestyle binoculars for leisure, travel, sport and the theatre.
- Timeless design: As a successor to the classic award-winning Eschenbach binoculars on show at New York's Museum of Modern Art, the club® appears in elegant black with precious metal detailing.
- Excellent image quality thanks to phase-corrected BaK-4 prisms and fully multi-coated lenses.
- Easy to handle and lightweight: Owing to their compactness and light weight, they will fit in any shirt or jacket pocket.
- Watertight and nitrogen filled.
- Spectacle eyepieces afford an optimal field of view even when wearing (sun) glasses.
- Accessories: high quality leather case, carrying strap, dust protection caps.

vektor zoom

ZOOMABLE PORRO
BINOCULARS WITH A
STYLISH LOOK.

- Practical 5-15 x zoom for variable magnification of the viewed object.
- Sharp, colour accurate images due to high quality BaK-4 prisms and fully multi-coated lenses.
- Compact, dynamic design makes the vektor zoom a desirable eyecatcher.
- Excellent value-for-money ratio.
- Accessories: Belt bag, carrying cord and protective dust caps.

vektor zoom 5 – 15 x 21
Item No. 42291

vektor pocket

TRENDY LIFESTYLE
BINOCULARS FOR YOUNG
AND ACTIVE PEOPLE.

- Trendy design: Its slimline, modern look makes the vektor pocket a desirable trend accessory at events and more besides.
- Ultra-compact design: Lightweight and handy, the vektor pocket never takes up much space.
- Excellent image quality thanks to BaK-7 prisms and fully multi-coated lenses.
- Easy to use smooth metal focusing control on the top and basic dioptr adjustment controls on the underside.
- Accessories: Stylish, robust belt bag and carrying cord.

Technical information

The different ranges and models of Eschenbach Optik binoculars are optimised in design, components and construction for different fields of use. The technical data provides precise details about this. But what lies behind the information given? The key technical terms are briefly explained here.

Porro prisms

The “conventional” prisms: Binoculars with Porro prisms are normally wider than comparable roof prism binoculars, but not as long. Owing to their wider-spaced objective lenses, conventional Porro binoculars offer slightly better stereoscopic depth perception at short distances than roof prism equivalents.

Roof prisms

These are very compact and therefore allow the binoculars to be built very slim in form. A higher level of optical precision engineering is required than for Porro binoculars of comparable quality.

BK-7 prisms

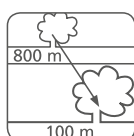

These prisms made from boron crown glass are the standard for a good quality image.

BaK-4 prisms

These carefully machined high performance prisms made from barium crown glass provide even better resolution of details and very sharp, bright images with high colour fidelity.

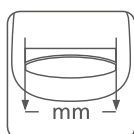

SK15 prisms

These prisms are made from high quality SK15 glass. They minimise unwanted internal reflections and provide razor-sharp images with optimum contrast.

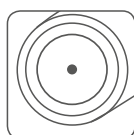

Magnification

The value gives the apparent magnification that the lens produces. With an 8x magnification the object appears 8 times closer to the viewer than in reality. Here, an object appears to be only 100 m away when in fact it is at a distance of 800 m.

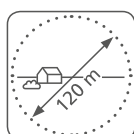

Lens diameter

This is an important performance figure of binoculars since its size crucially determines the light-gathering power: The bigger the lens, the more light that reaches the eye and the brighter the image. The objective lens diameter is stated in mm.

Exit pupil/Brightness index/Twilight factor

These are arithmetic values that result from the ratio of magnification and lens diameter. Important in practice: an exit pupil between 2 and 3 mm is sufficient for use in daylight. Binoculars with an exit pupil of 5-7 mm should be chosen for difficult light conditions.

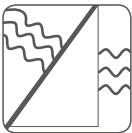

Field of view

Specifies the width of terrain seen through the binoculars at a distance of 1,000 m. The greater the field of view, the easier it is to view landscapes or moving objects, such as animals or competitors at sports events. Binoculars with wide-angle optics (with the designation: VVw) have a particularly wide field of view.

Near point

This number indicates the shortest distance at which objects can be seen sharply and without distortion. This number is important when buying binoculars for use in museums or outings where viewing is at short range.

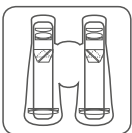

Phase correction

This particularly elaborate application of special surface coatings to the prisms of roof prism binoculars is the ultimate for outstanding image quality.

Dielectric mirror coating

A dielectric mirror coating inside the prism system allows almost 100% reflection of the incident light and prevents the coatings from ageing. This coating ensures contours always remain distinct and clearly discernible even in poor light conditions or during the twilight hours.

Internal focusing

Focusing means adjusting the sharpness of an image. Only the lenses inside the binoculars are moved during internal focusing. This closed system prevents dust, air or moisture from being drawn in.

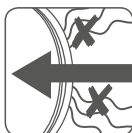

Waterproof

This term refers to a system of water repellent features on the casing and moveable parts that makes the binoculars resistant to pressured water.

Nitrogen filled

In contrast to air, nitrogen contains no residual moisture and so prevents the internal optics from misting up if the ambient temperature fluctuates.

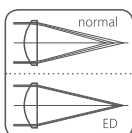

Coating

Eschenbach binoculars have fully multi-coated optics. This means that all glass-to-air surfaces have an extremely thin anti-reflection coating to optimise "light movement" through the binoculars to the eyes. A magnesium fluoride coating (magenta coating) is the standard. On some binoculars this is combined with multi-coating on one side of the lens and eyepiece to improve light transmission. For the highest vision requirements though, multi-coating is applied to all lens surfaces.

To ensure true-to-life, completely colour accurate images, Eschenbach applies a "naturebright" coating to its farlux®, bison® and regatta® binoculars.

Extra-low-dispersion (ED) glass

This expensive to produce glass compensates for chromatic aberration that normally occurs due to the differing dispersion of the light-beam colour components and is seen as colour fringing along edges and at transitions. ED glass ensures vivid true colour images, extremely rich in detail and with a sense of depth.
