

MagniLink ChromeViewer™

– software for Chromebook

MagniLink ChromeViewer™

MagniLink ChromeViewer™ is an innovative software for Chromebook that is used to display the image from a MagniLink reading camera system. The software controls the reading camera's features, such as magnification, artificial colors and brightness, and provides the user with the ability to make individual adjustments for the best possible experience.

Functionality:

- Different color and brightness settings, e.g., natural and artificial colors.
- Different levels of magnification.
- Lockable autofocus.
- Take and view pictures.
- Record and view videos.
- Mirror, rotate and freeze pictures.
- Automatic updates (requires Internet).
- Various guide lines to facilitate reading.
- Different ways to control functions. Either via menus, keyboard shortcuts or buttons on the reading camera's control panel.
- Configuration of individual shortcuts.
- Camera image positioned at top/front of all open applications.
- Select several active split modes and switch between them.

Recommended system requirements:

- Chrome OS version 59
- 1 integrated USB 3.0-port
- Intel i5 processor
- 4 GB RAM

LVI has tested the software on a number of Intel-based Chromebooks without problems, but there is no guarantee that the system will work with all Chromebooks.

General:

MagniLink ChromeViewer™ is designed for Chromebooks and is easily downloaded from the Chrome Web Store.

There is similar software, although not with exactly the same functionality, for PC and Mac computers. When a MagniLink S Premium or MagniLink Pro are purchased, the software is included. The software can also be purchased as an option for many of our other reading cameras.
