ZoomText

ZoomText 2018

ZoomText is a powerful computer access solution that allows low vision computer users to see, hear and use everything on the computer screen. ZoomText 2018 is available in two product versions: Magnifier and Magnifier/Reader.

ZoomText Magnifier

ZoomText Magnifier provides the complete set of screen magnification tools for enlarging and enhancing everything on your computer screen, among other things:

- Flexible Magnification. ZoomText provides a full range of magnification levels up to 60x. Levels include: 1x to 8x in steps of 1, 10x to 16x in steps of 2, 20x to 36x in steps of 4, 42x, to 60x in steps of 6, and fractional powers of 1.2x, 1.4x, 1.6x, 1.8x, 2.5x, 3.5x and 4.5x.
- Powerful Zoom Windows, for both single and multiple monitor configurations. Multiple monitors allow you to view multiple applications simultaneously.
- Zoom to 1x feature lets you instantly switch between zoomed and 1x views, without having to zoom in and out one level at a time. And when you zoom out to 1x, all of the other ZoomText features are still there for you.
- Visible Pointers and Cursors. Size and colour enhancements make it easy to see the mouse pointer.
- Finder that helps you search, skim, navigate, and read in documents, web pages and email.
- Geometric Smoothing smooths the edges of text (and graphics).

ZoomText Magnifier/Reader

ZoomText Magnifier/Reader is a fully integrated magnification and screen reading program that enlarges, enhances and reads aloud everything on your

computer screen. ZoomText Magnifier/Reader includes all the features of ZoomText Magnifier, plus for example:

- Complete Screen Reading. ZoomText automatically speaks all program controls and events as you navigate through applications; including menus, dialogs, list views and messages.
- With the AppReader you can read right in the target application or switch on-the-fly to the high contrast text view that's better for visual reading.
- Typing echo. Each key or word that you type is automatically spoken.
- Mouse echo, automatically reads text that you point to.
- The speakIt tool allows you to read selected areas of the screen by clicking or dragging the mouse.
- Built-in Premium Voices. All versions of ZoomText Magnifier/Reader now include Vocalizer Expressive voices.

System requirements

ZoomText 2018 supports Windows 10, 8.1, or 7 with Service Pack 1 or later.
