

Power ON Button

To activate the Digital Media Locker™, press the on/off button. On will be indicated by a RED LED.

For applications where normal Digital Media Locker™ operation requires an independent 12V battery (Boat, RV), power down the AQ-DM-2Bx via the RF remote control. This will insure against independent battery drain. Other applications using 12V power converters are compatible with the AQ-DM-2Bx.

RF Wireless Remote Control Synchronizing

Each Digital Media Locker™ comes with a matching RF Wireless LCD Remote control to maximize wireless performance. For all newly purchased remote controls, you will need to activate/Synchroize those remote controls to the AQ-DM-2Bx by following the steps below:

- a. Press and hold the  button (Play/Pause) on the remote control and then press the  Power button simultaneously for 2 seconds. The LCD will display "Pair". 
- b. Turn on the Digital Media Locker™ by pressing the power button on the AQ-DM-2Bx within 10 seconds after the remote is paired. (A Red LED light will turn on under the power button to indicate the unit is turned on.)
- c. Once synchronizing is complete, the LCD will return to the original screen setting.

i If you loose your remote control and buy another new remote control, please follow the above to start pairing before normal usage.
