CUTLERY AND TRAY DISHWASHER

- Cutlery and tray dishwasher for automatic high capacity system, optimal dish and drying results.
- Feeding system in combination with tray and cutlery dishes are washed standing gives high capacity and optimal use of dish and drying function.
- Optimum cleaning of cutlery through placement in special baskets. The cutlery is dished standing, no cutlery blocking each other.
- The clean trays can either be stacked directly in a trolley, or for increased capacity via an external tray changer in two trolleys filled sequentially.
- The cutlery is collected in a box or on one conveyor connected directly to an ACS automatic cutlery sorter.
- Automatic and manual operation: For use in fully automated handling systems of trays and cutlery. The machine can also be run manually and used as a backup machine. Possibility to wash other goods in baskets and GN-containers directly on the band.

- Double heat recovery through condensing unit and heat exchanger. A total of about 17 kW is recovered.
- Low water and energy consumption.
- Very good wash and drying results.
- Good working environment, the machines are sound and heat insulated with large well-balanced doors which are easy to open-close.
- Easy to clean, open construction.
- High capacity, 1500 trays / hour.
- Handles large trays, height up to 530 mm, width 500 mm.
- Based on well-proven construction - simplifies service and spare part bearing.

OPTIONS

- Steam-heated through electrically heated drying zone (50-140 kPa) or fully steam-heated machine (150-250 kPa).
- Stainless steel pumps.
- Demineralised water in the final rinse.
- Protection bar front side.
- Manual flush pressure switching for potwashing / normal dish.
- Break tank incl. booster pump. Back flow protection according to EN1717.
- Electrical connection of tray stacker/ tray changer.

Size part 2 (LxBxH) (mm) **	3800x1100x2100
Weight part 1 (kg) **	950
Weight part 2 (kg) **	580

* Normal delivery in 2 parts. Option of delivery in more parts.

** Including packaging.

1. Extractor 400x100mm without damper. Air quantity approx. 800 m³/hour.
2. Electrical connection from ceiling.
3. Alternative electrical connection from floor.
4. Hot water connection *
5. Cold water connection *
6. Steam connection * (steam-heated machine).
- Steam pressure 150-250 kPa (Fully steam-heated machine).
- Steam pressure 50-140 kPa (Electrically heated drying zone).
7. Condensation water connection (steam-heated machine).
8. Floor drain 400x600 mm.

* Connection from floor or ceiling.
