

Cloud ERP User Feedback Program

Influencing the next wave of process innovation

DO YOU GET THE VALUE FROM OUR SOLUTION?

- Influence the development of next-generation intelligent ERP processes
- Test the latest innovations and provide feedback based on your business and process experience
- Connect with peers and SAP developers as you guide the future SAP Cloud ERP user experience and features

GET INVOLVED – LIVE!

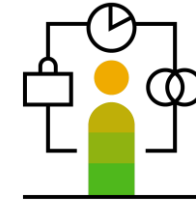

- SAP invites customer users to share their feedback while testing end-to-end business processes
- No isolated screens or fragmented activities – feedback sessions are run directly in the cloud ERP systems
- Your feedback will directly influence our product development – user experience, integration, features & processes

ENGAGE WITH US – NOW

- We are looking for your business expertise across all domains: Finance, Manufacturing, Supply Chain and more
- Take advantage of difference influencing opportunities and join the program in one of our global feedback sessions

Cloud ERP User Feedback Program

Influencing the next wave of process innovation

**MARK YOUR
CALENDAR!**

Influence the development of next generation intelligent ERP processes. Test the latest innovations and provide feedback based on your business and process experience. Connect with peers and SAP developers as you guide the future of SAP Cloud ERP user experience and features.

MOTIVATION

Your voice is important: We want to ensure customers get value from our solutions!

Business users and their specific role within a business process are at the heart of the Cloud ERP User Feedback Program.

WHAT'S IN IT FOR OUR CUSTOMERS?

Your feedback will directly influence our product development on three levels: User Experience, Integration, Features & Processes

GET INVOLVED – LIVE!

Share your feedback while testing end-to-end business processes in sessions facilitated by SAP. No isolated screens or fragmented activities -- feedback sessions are run in an actual SAP S/4HANA system with realistic data.

ENGAGE WITH US – NOW

We are looking for your business expertise across all domains: Finance, Manufacturing, Supply Chain and more. Take advantage of difference influencing opportunities and join the program in one of our global feedback sessions.
