Consulting

# S5 drive agility and change with SAP Cloud Platform

We accelerate integration across your value chain, simplify development of application extensions, and expand business value with solutions from the open SAP ecosystem.

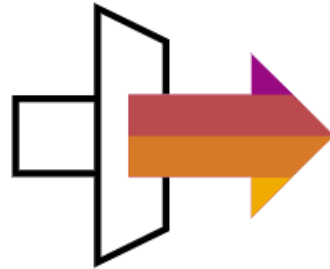

# Why our clients use SAP Cloud Platform

## Accelerate integration across the value chain

- Improve efficiency and productivity, cut costs, and greatly increase our client's ability to deal with change.

## Simplify development of application extensions

- Develop, enhance and adapt SAP solutions for unique needs with methodologies, enterprise-grade tools and services, security features, and ready-to-use business content.

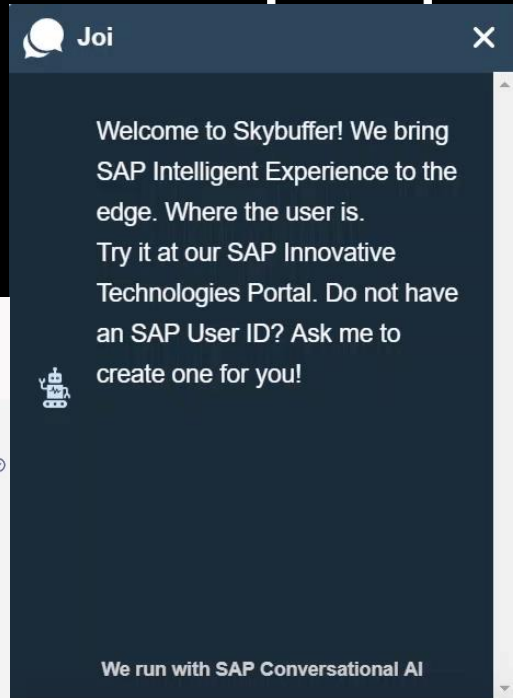

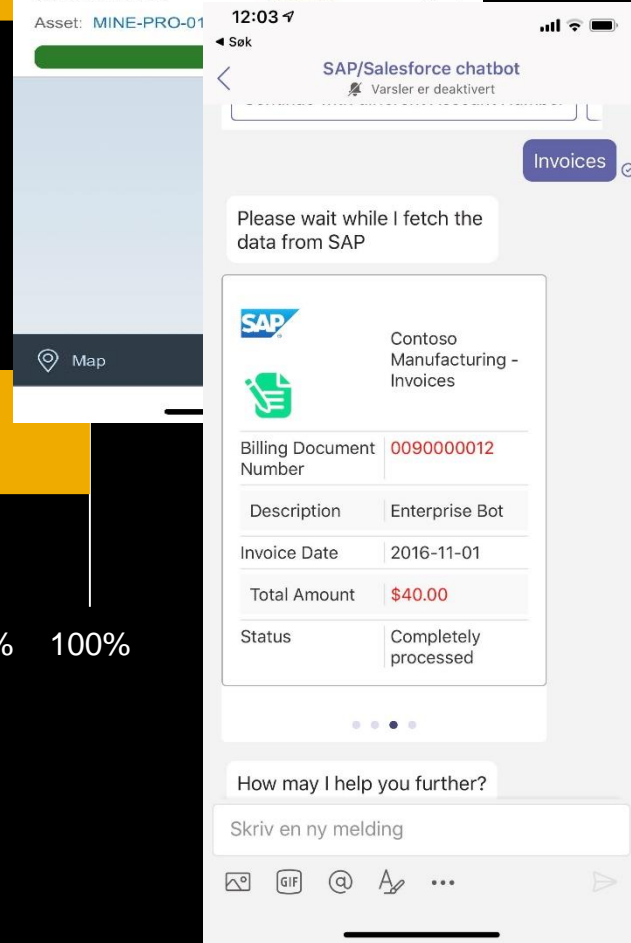

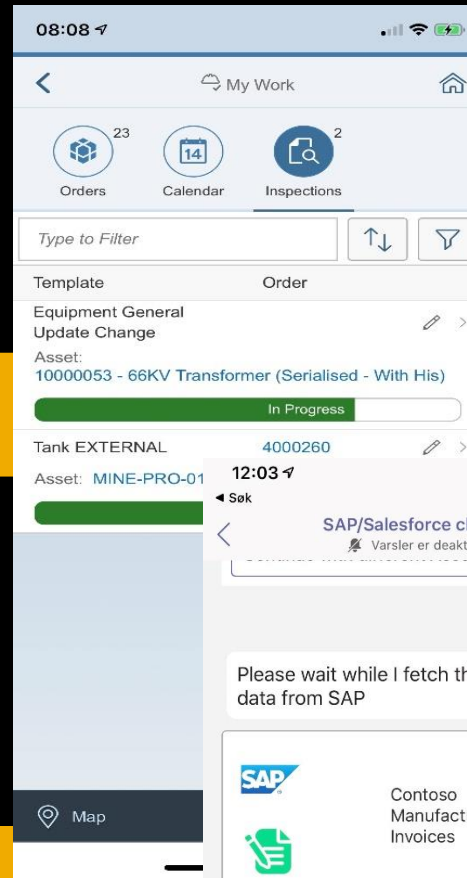

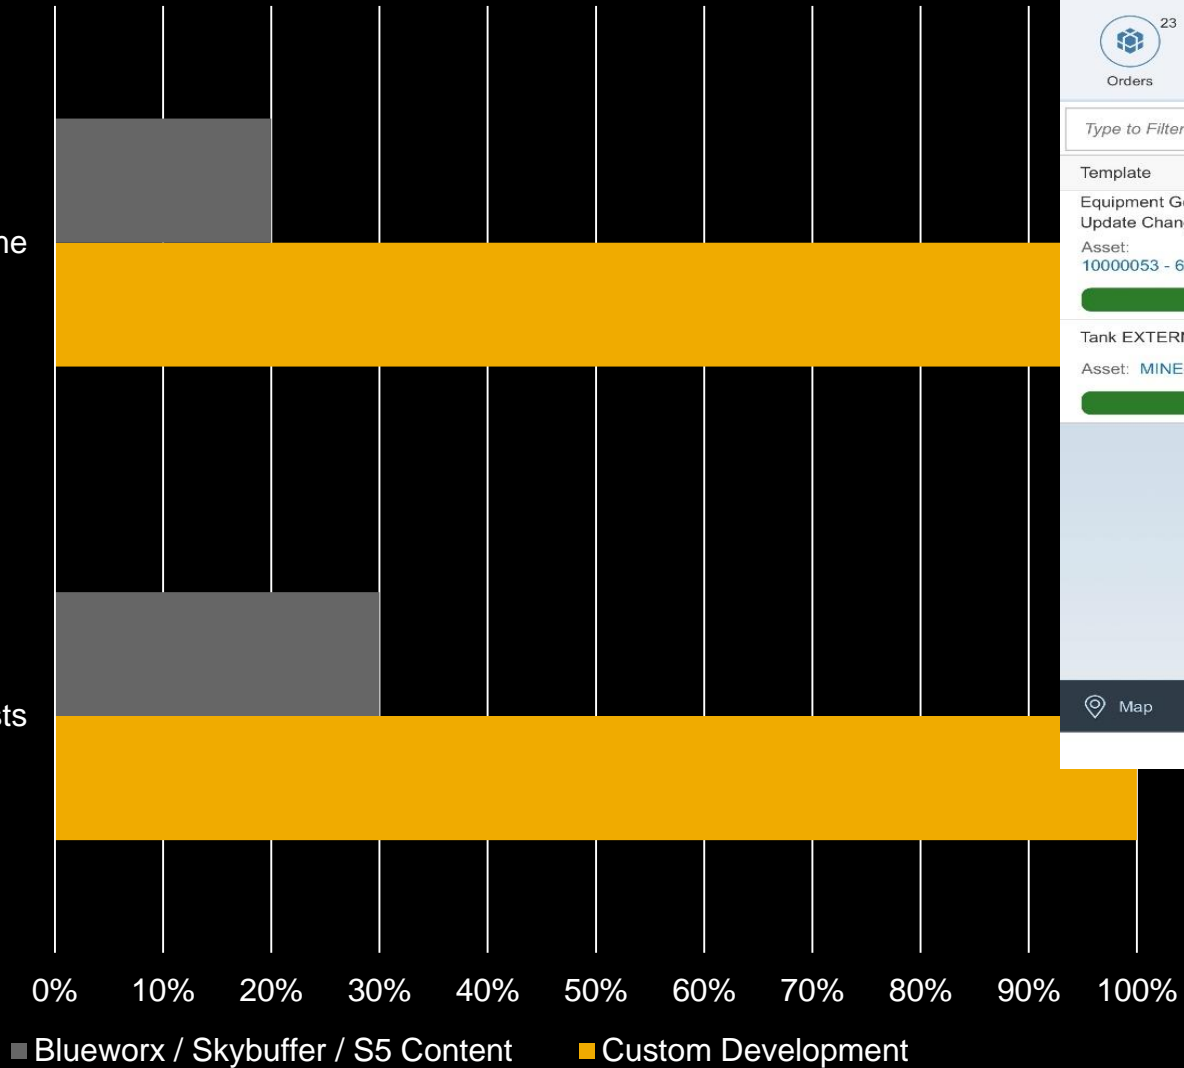

## Expand business value

- Reduce development investments by leveraging the open partner ecosystem that delivers prebuilt solutions to solve line-of-business and industry-specific needs.

# Drastically Decreased Costs and Time
