SAP Integration Platform Capabilities: A Journey from On-premise to the Cloud

Dr. Vadim Klimov, SAP Integration Architect at Arm
November 19, 2020

About Arm

- A UK based company founded in 1990 with headquarters in Cambridge.
- Became international over years of its operations in the semiconductors industry and has a global presence nowadays.
- Main business: design of ARM (Advanced RISC Machine) processors.
- Business model: semiconductor Intellectual Property (IP) licensing.
- Products: processor IP (CPUs, GPUs, physical IP, system IP, security), IoT, software & tools.
- Industries: automotive, healthcare, industrial, infrastructure, logistics, mobile computing, retail, smart cities, smart homes, smart spaces, storage, utilities & energy, wearables.

Landscape Overview (an SAP Centric View)

Virtual Private Cloud provider

Arm on-premise

Custom-built and 3rd party applications

SAP Cloud Platform (Neo + Cloud Foundry)

SAP Cloud Applications

MuleSoft CloudHub

aws

Custom-built and 3rd party applications

Microsoft Azure

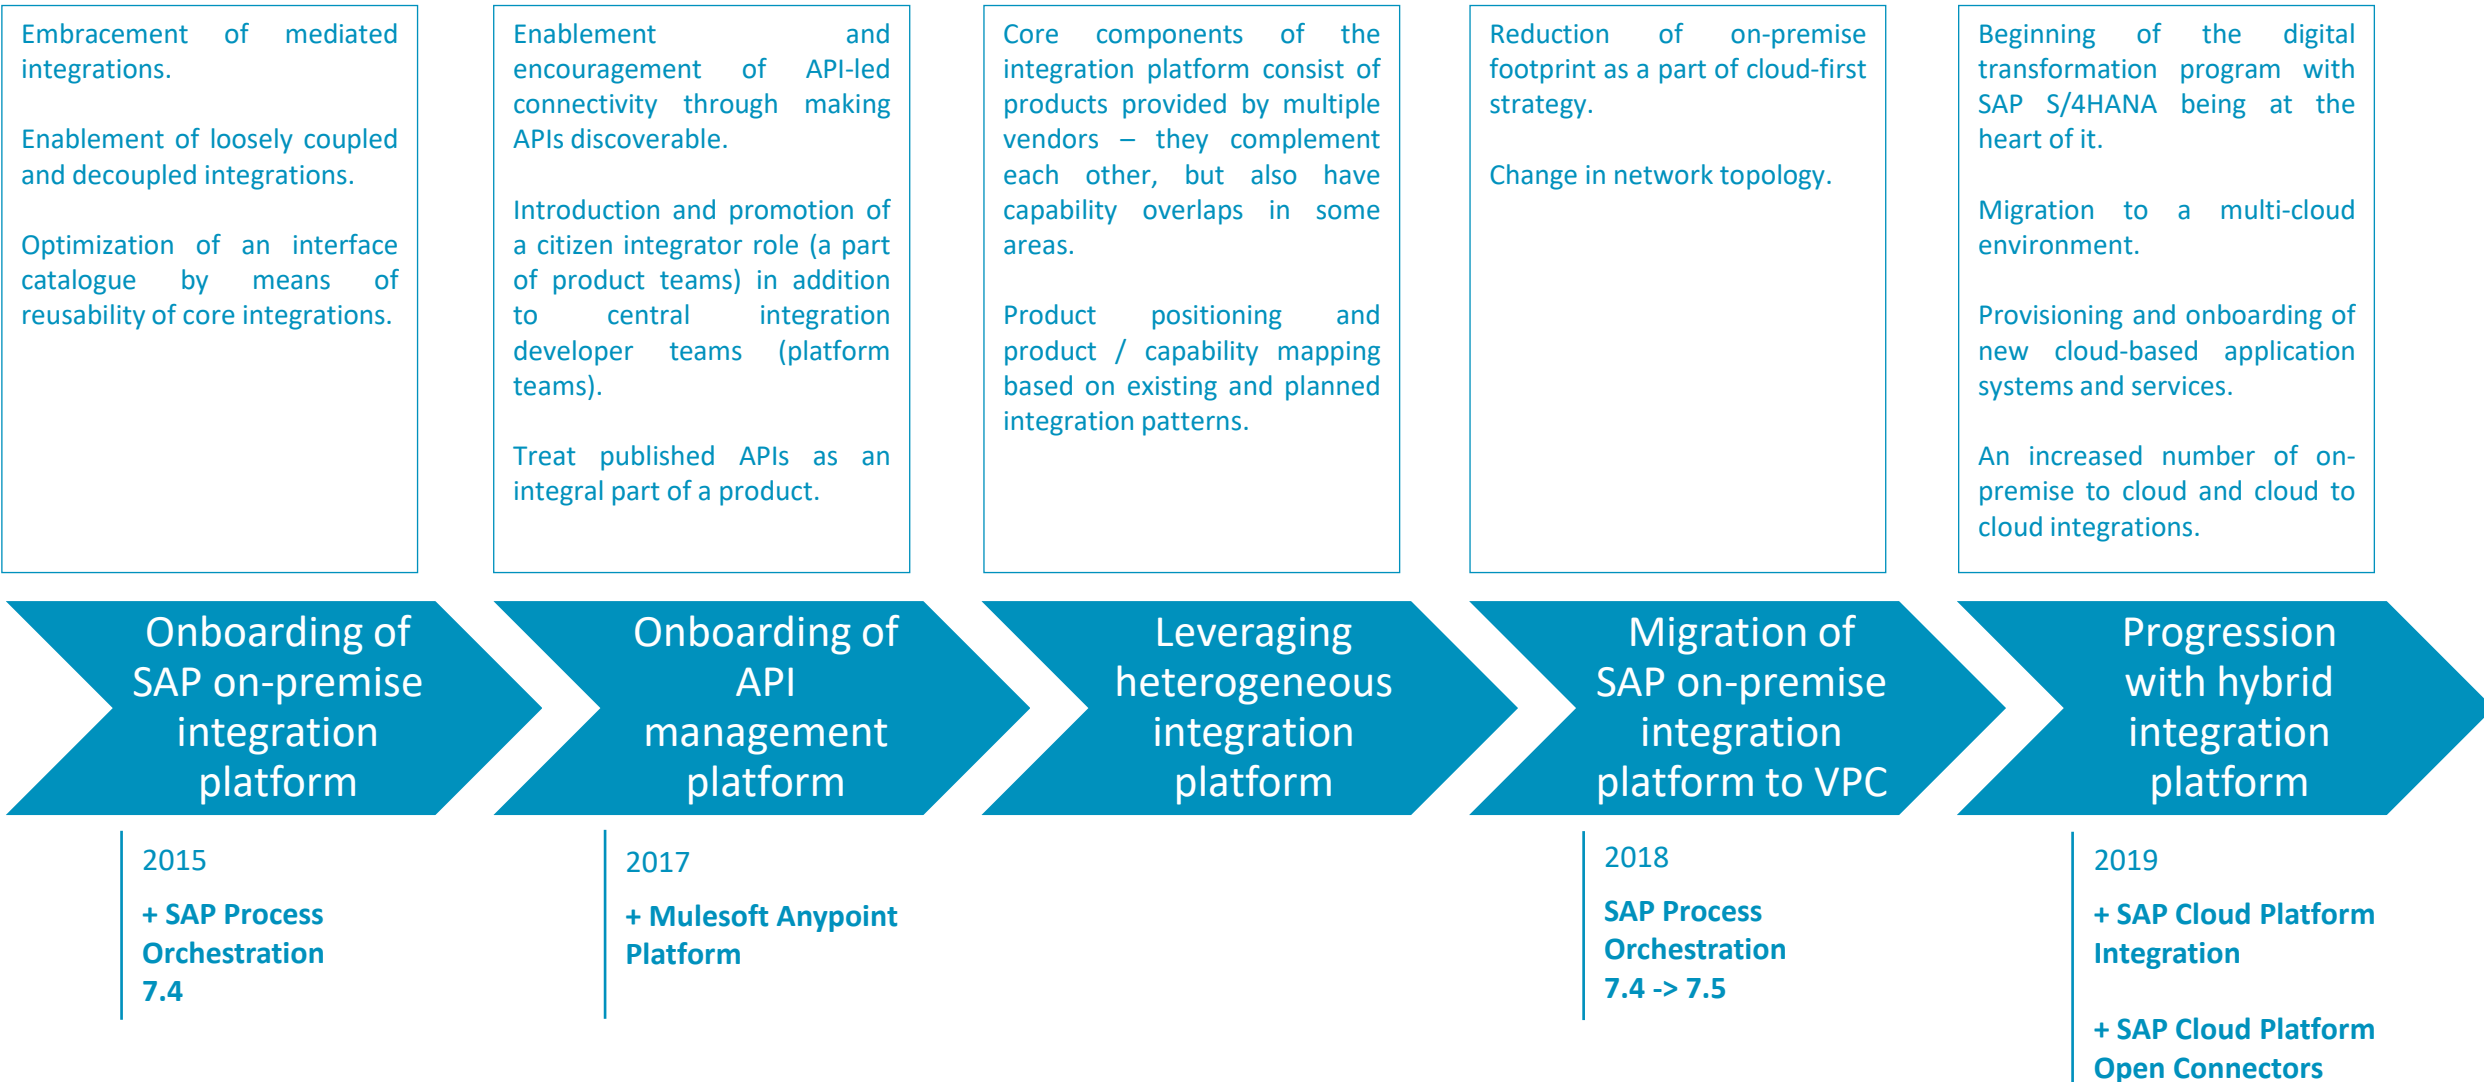

Custom-built and 3rd party applications

External 3rd party applications

Integration Capabilities Evolution: Past and Current

Integration Capabilities Evolution: Future

A growing number of **cloud services' subscriptions**.

A central focus on **event-driven** and **API-led** integration patterns.

Source, distribute and subscribe for events across the landscape. Robust pub/sub mechanisms and event brokering are crucial.

Expose APIs for core business objects and operations with them.

Events and APIs don't compete but complement each other.

Event-driven and API-led cloud-first integrations

2020+

SCP Integration Suite migration from Neo to Cloud Foundry

SCP Integration Suite – core for SAP centric integrations

Mulesoft Anypoint – core API Management, integration platform for non-SAP systems
