

hypernet[®] Learn

Complete, user-friendly and efficient learning

Our hypernet[®] Learn service is focused on the students' goals and performance. It supports teachers in planning of lessons and assignments as well as in evaluation of assignments, on group and individual level - all based on national goals or standards defined by the school authorities.

hypernet[®] Learn provides teachers with a great performance overview and all the necessary support related to grade warnings, action programs and meetings with students and guardians. The greatest benefit for teachers is the support in the evaluation process throughout the year. With hypernet[®] Learn we provide an essential tool for teachers to evaluate and assess students in a structured way, which will increase the pedagogical efficiency and performance over time.

Benefits of hypernet[®] Learn

User-friendly and efficient service for:

Teachers

- Student evaluation and assessment based on national goals and standards
- Planning and assignments, grade warnings, action programs and meetings
- Enhanced communication with students and guardians

Students

- Access to planning, assignments, evaluations and performance overview
- Submit assignments and self evaluation
- Focus on individual objectives and performance

Transparency for all

We do not stop there. The hypernet[®] Learn service also supports the individual student by enabling them to access planning, assignments and evaluations in one and the same place. Hence, it is a great communication and work tool for students where they can view assignments, submit completed assignments and view the teacher's evaluation. Students are also able to evaluate themselves and view their performance overview, including individual objectives, focus and action programs. So, with hypernet[®] Learn we also provide an essential service to students which will increase their efficiency and support them in meeting their individual objectives.

With hypernet[®] Learn we also enable guardians to take an active role in the development of their child by providing the guardians with all the relevant information in regards to their child's overall performance, individual assignments and evaluations. hypernet[®] Learn becomes a natural communication channel between the teacher, student and the guardians with focus on the student's performance at all times.

Last, but not least, hypernet[®] Learn is an excellent management tool providing school management with a complete overview of the pedagogical process and the status when it comes to the performance of students and teachers.

So, if you need a user-friendly and efficient service that supports teachers, students, guardians and management in the pedagogical process, hypernet[®] Learn is the service for you.
