

ENVIRONMENTAL POLICY

Riflex Film AB shall produce different types of film from PVC and other polymers with minimal environmental impact and thus contribute to a sustainable development of its products, processes and services. These shall be continually improved to meet the market's increasing demands for environment, quality and efficiency.

This means that

- We strive for continuous improvement in resource utilization and technology
- We work proactively to minimize the impact on environment and health
- We believe that all employees must be properly trained in environmental issues and be well aware of how environmental issues affect the work functions
- We comply with legislations and other regulations
- We have good communication with customers, authorities and suppliers on environmental issues
- We openly report ongoing environmental work
- We consider our environmental work as a long term investment for future generations

Anders Leidefalk

Managing Director
