Presenting: Andreas Chrysostomou

STM Validation Final Conference

Co-financed by the European Union
Connecting Europe Facility
The situation today …

• Efficiency, environmental sustainability, and safety are not at the necessary levels in the maritime transport domain.

• To reach an acceptable level and increase both economic and ecologic situation we need better:
  • collaboration
  • situational awareness among involved actors
  • interoperability between systems and actors
  • innovative digital services

• … and lower barriers for service providers to enter the market of sea transports
Sea Traffic Management offers

• digital service providers to engage in an emerging community
• by the utilization of
  • standardized messaging formats
  • standardized interfaces
  • operational and technical guidelines
• where different actors will necessary take different roles in this emerging ecosystem
• to provide the maritime community with innovative services that provide value of sea transports as an integrated part of the global supply chain
A few words about us…

- Established February 2017 as an impartial company allowing everyone to connect
- HQ Located in Limassol, Cyprus
- An inspired team of Industry experts
- Run and manned by people with a long and established experience in the shipping industry with an extensive network of contacts and affiliations
- Associate partners of STM Validation Project
