

Where do you place yourself in terms of sector and aim of assessments:

1 Respondent

Key differences to tackle when combining forces?

Key synergies to tackle when combining forces?

Main challenges of combining forces

Aligning priorities

Complementary approaches

Availability of data

Time and resources

Not linking up agendas

Public demand

Trade offs between public and private goods and benefits

Governance & Strategy

Grassroots action vs. top down coordination

Main challenges of combining forces

Aligning priorities

Public policy alignment to private financing mechanisms

Focus on economy rather than people

Balancing priorities

For which decisions?
Management? Strategic?
Policy?

Difference between public goods and private profit

Multiple competing priorities

Getting right people and right propositions together to effect change and investment

Finance

Main challenges of combining forces

Right people in pivotal roles
with enough power to see
goals achieved.

Different world views of how to mainstream
values in a way that recognizes tangibility and
intangibility

Shared risk

Finding a shared set of objectives so we can
develop the combined force from the vision level
before we try to operationalise. That will be
iterated over time.

Stakeholder involvement

Greater alignment

Aligning priorities

Communication of concepts of public and
private goods, perhaps require new (and less
economic) terminology, public benefits?

Sharing different perspectives

Main challenges of combining forces

TCFD & Natural Capital

Greater inter-sectoral
acceptance

Main opportunities of combining forces

Impact

Implementing policy together
with markets

Place based dialogue can
allow us to recognise shared
agendas and priorities

System change

Achieving better outcomes for
our shared future

Saved time and money

Joint investments

We all need a stable
ecosystem to survive.

Shared approach for place-
based issues

Main opportunities of combining forces

Linking industrial strategy with
25 year plan

Combining different
perspectives

Greater inter-sectoral
acceptance

Greater alignment

Place based opportunities
where there is public and
private interest to the land or
sea management

Identifying common goals

Scale and leverage
