Material

Perspex

Finish

PA6 Black

Description

To be used with Franchi automatic door operators

Advanced Laser Technology - Uses Time-of-Flight (ToF) laser scanning to accurately detect people and objects within the door's safety zone.

Complete Door Protection - Creates a high-density detection curtain with up to 170 measuring points, providing coverage across the full door leaf and swing area.

Finger and Hinge Protection - Dedicated Finger Detection Technology monitors the hinge area to help prevent hand and finger injuries during door operation.

Reliable on Any Floor Surface - Laser-based distance measurement delivers consistent performance regardless of floor colour, texture, or ambient lighting conditions.

Compact and Discreet Design - Low-profile sensor mounts directly onto the door for a clean, modern appearance while maintaining maximum pedestrian safety.
