franchi® | specifications

Introduction

Franchi has been supplying quality hardware and security products for over 50 years. Since its inception in 1996, Franchi's specification division has supplied architectural ironmongery packages for some of the most prestigious building projects in the UK. Our reputation for quality products, flexibility and stellar service has made us a firm favourite with Architects, Designers, Clients and Contractors, who repeatedly trust us to deliver an outstanding product irrespective of the project size or complexity.

Developed over many years to meet the needs of today's most demanding projects, the Incasa range of architectural ironmongery represents the very best in design, quality and technical performance.

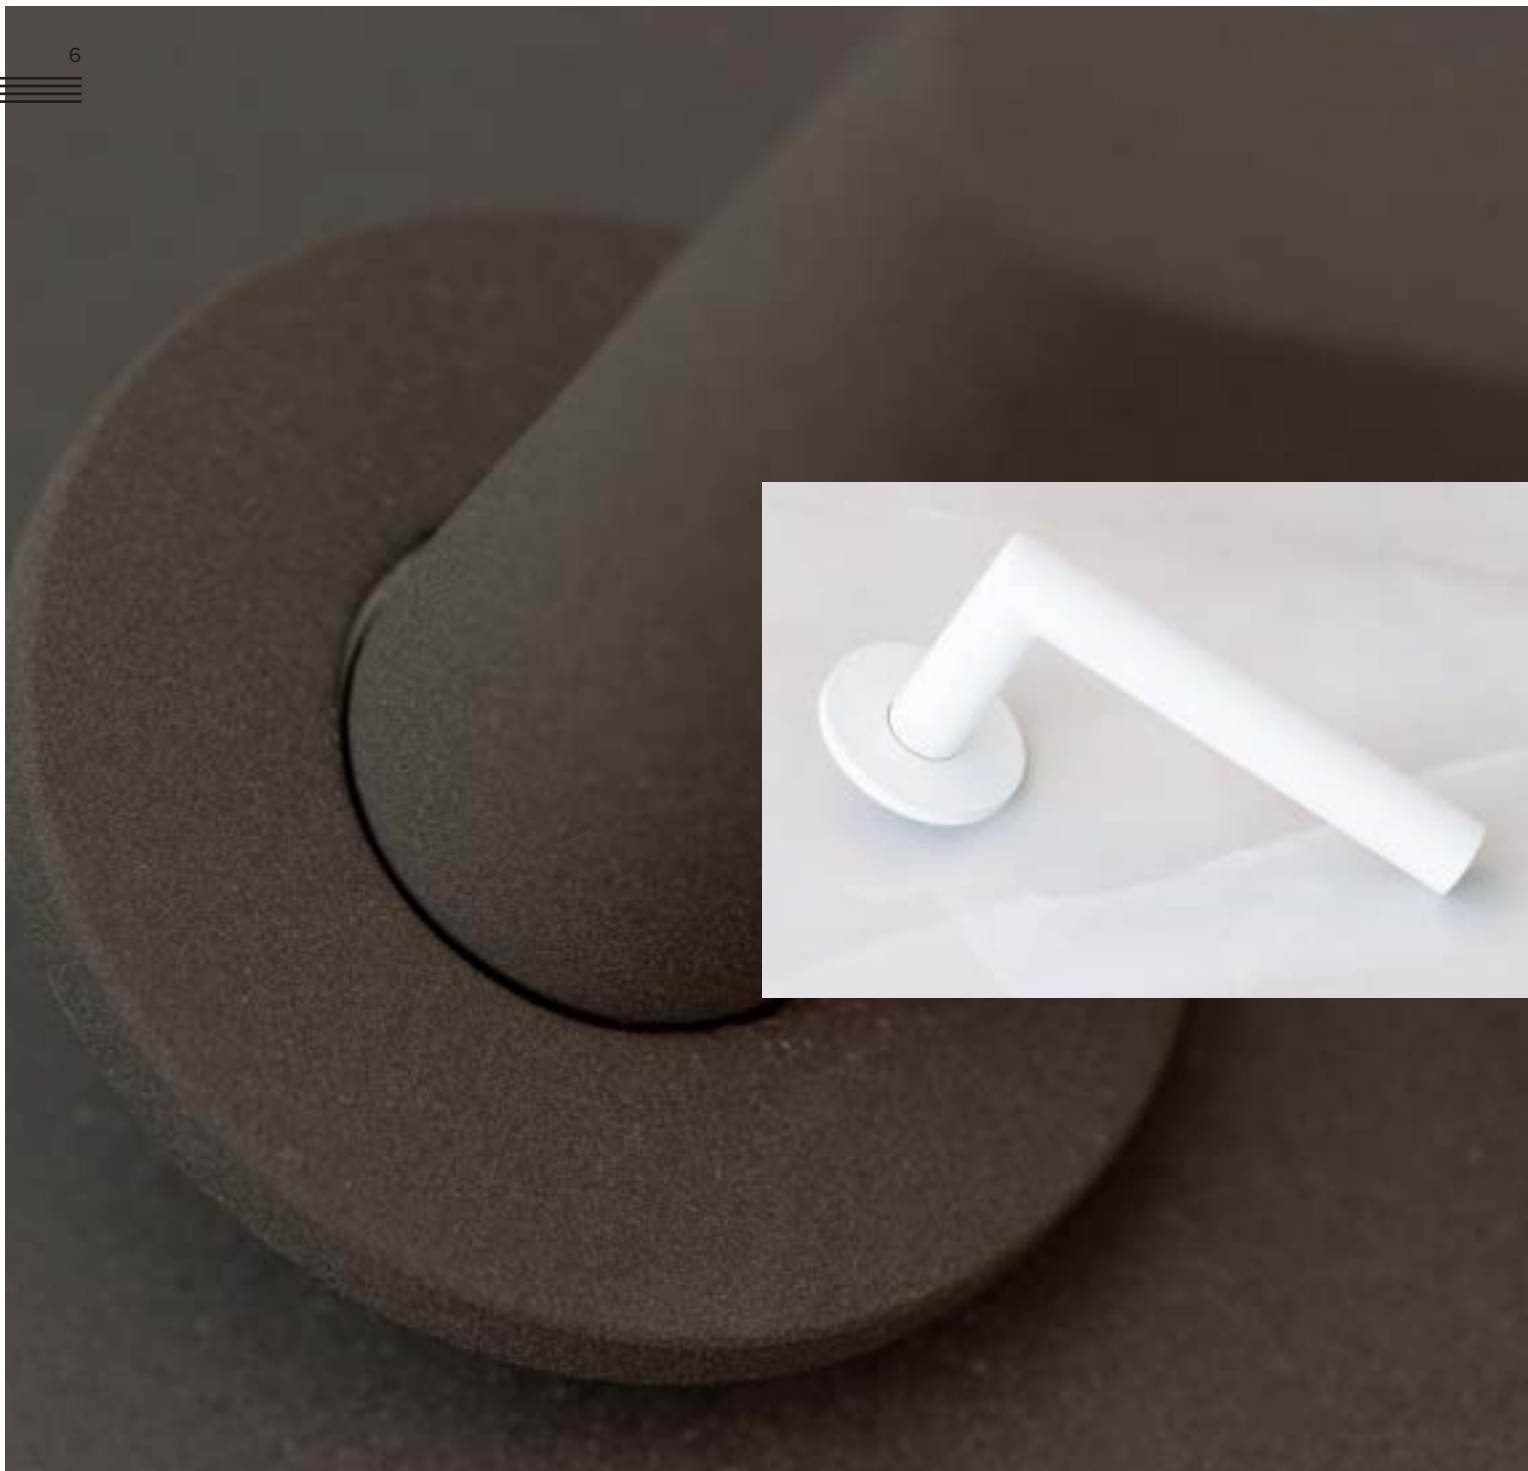

“

In Franchi, we find special shared values in the pursuit of excellence and the evolution of craft, but also a real joy in the celebration of our relationship and trust”.

Tim Gledstone,
Partner, Squire + Partners

Lever handles

With a limitless range of designs, Incasa lever handles are suitable for the most contemporary project to minimalistic or late 20's retro. There are also bespoke options for client facing executive areas.

Using our compensating ball bearing rose technology, with solid back-to-back fixings, Franchi lever handles come with a 25-year mechanical guarantee, offering the client peace of mind and years of hassle-free operation.

All Incasa lever handles are manufactured in the UK, made using marine grade 316 stainless steel and all designs are available in any one of our 48 finishes, including bespoke finishing and RAL colours.

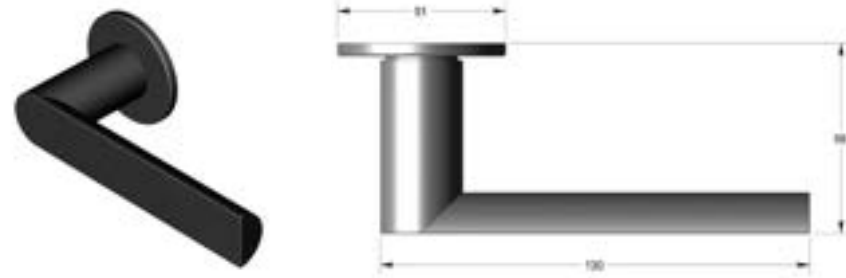

Lever handle range

Below is a sample selection of some of our more popular lever handle designs.
Visit our specification [website](#) to view over 30 designs in 48 finishes.

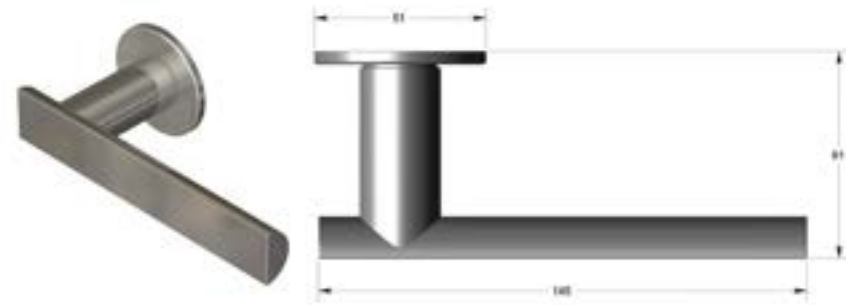

D section mitred lever handle on round rose

Timber range

With environmental concerns always at the forefront of our minds, Franchi has long been looking at more sustainable materials with less impact on the planet. Franchi timber offers FSC certified material in over 9 standard variants from European oak to Iroko. Add to this, the ability to stain your timber to reflect your project colour palette, this is now a truly viable alternative to stainless steel or brass products.

Franchi timber also offers the user a more connected feel to the project, ergonomic shapes and warm to the touch, each item is hand crafted to give a unique appearance and feel.

With new CNC technology we are also able to offer bespoke profiles, to match individual project needs.

Aluminium range

Aluminium has long been used in the production of door furniture, some of the most iconic designs and ranges were first conceived in aluminium. Over the years stainless steel has overtaken aluminium as the go to material.

Franchi aluminium takes many of the benefits of this versatile material to create an almost limitless range of profiles and possibilities. Not only is aluminium the most recycled material, with almost 98% of our aluminium coming from recycled content. It uses less energy to manufacture and is lighter than steel or brass, making shipping easier and more environmentally friendly.

We have created a range that not only looks elegant, is environmentally friendly and has endless design possibilities, adding to that, it is also available in the New Franchi Diamond ceramic coating. More durable than standard powder coating and with a depth of colour similar to PVD, Diamond aluminium products are suitable for all commercial office projects.

Diamond ceramic

As the world's leading thin film coating, Diamond's unique formulation enhances many physical performance properties including exceptional corrosion protection, hardness, adhesion, flexibility, impact, chemical, and wear resistance.

The superior ceramic coating contains a unique blend of ceramic particles that are sprayed onto the surface, which then crystallises and covers the entire surface.

Ceramic is designed to enhance the aesthetic by providing a unique finish with enhanced colour options combined with distinctive patterns and a true flat and deep tone.

Simple and quick to apply with a low rejection rate and using low oven temperatures to harden, gives Franchi Diamond Coating great environmental and sustainability qualities.

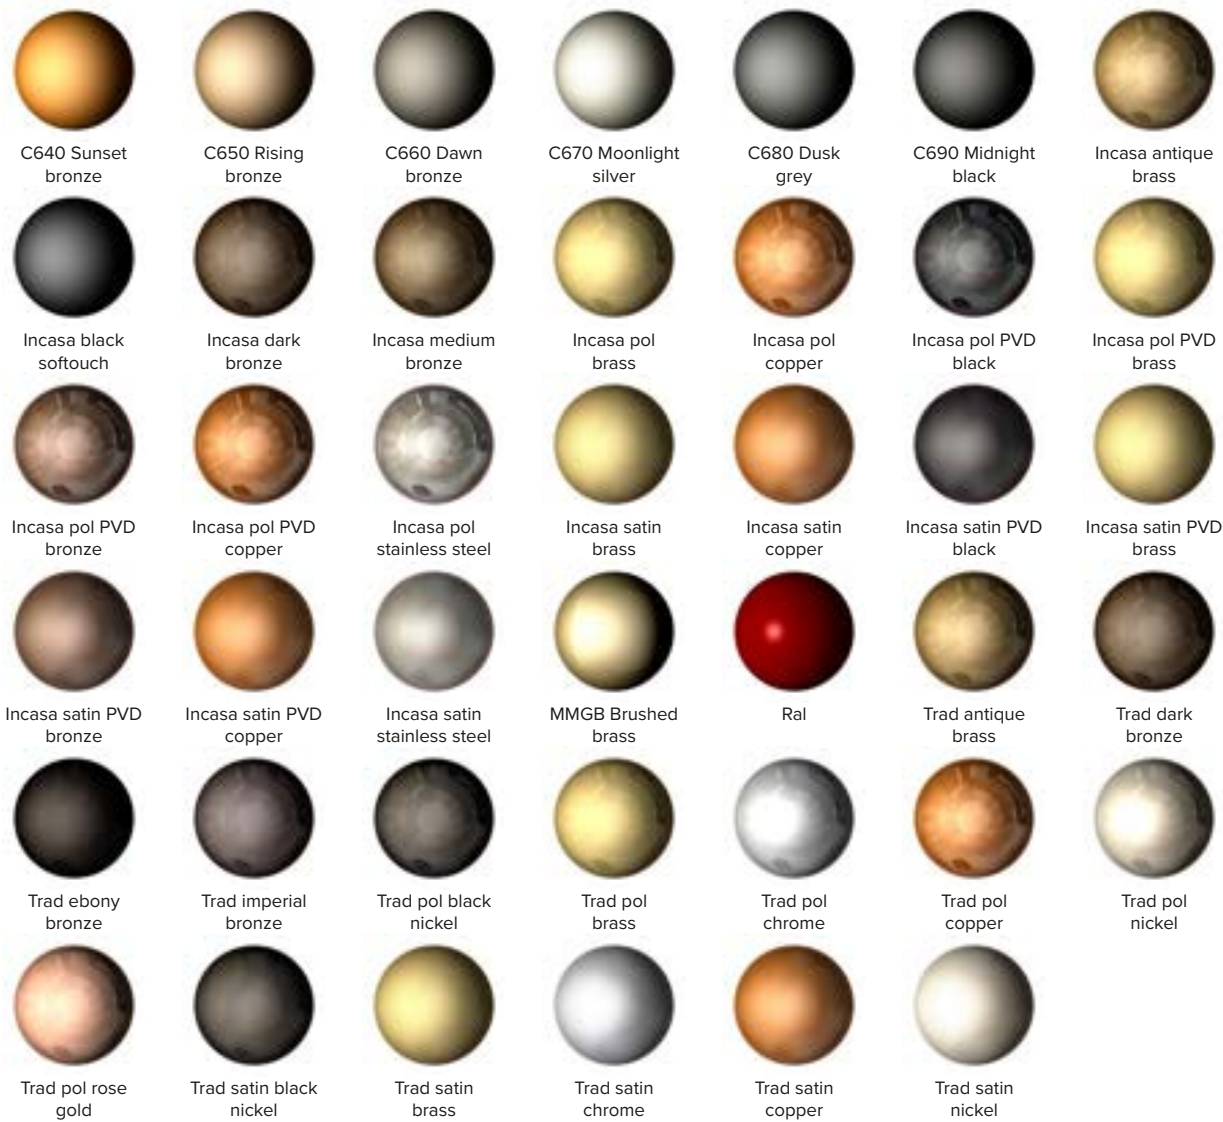

We love to make an entrance

At Franchi it's all about coordination. Whether that is coordinating the finishes across all your ironmongery specifications or coordinating the product design across all items; any one of the Franchi specifications team will be happy to assist.

We have over 150 years of combined experience within the team helping us deliver mammoth commercial projects to the more bespoke single floor fitouts.

Finishes

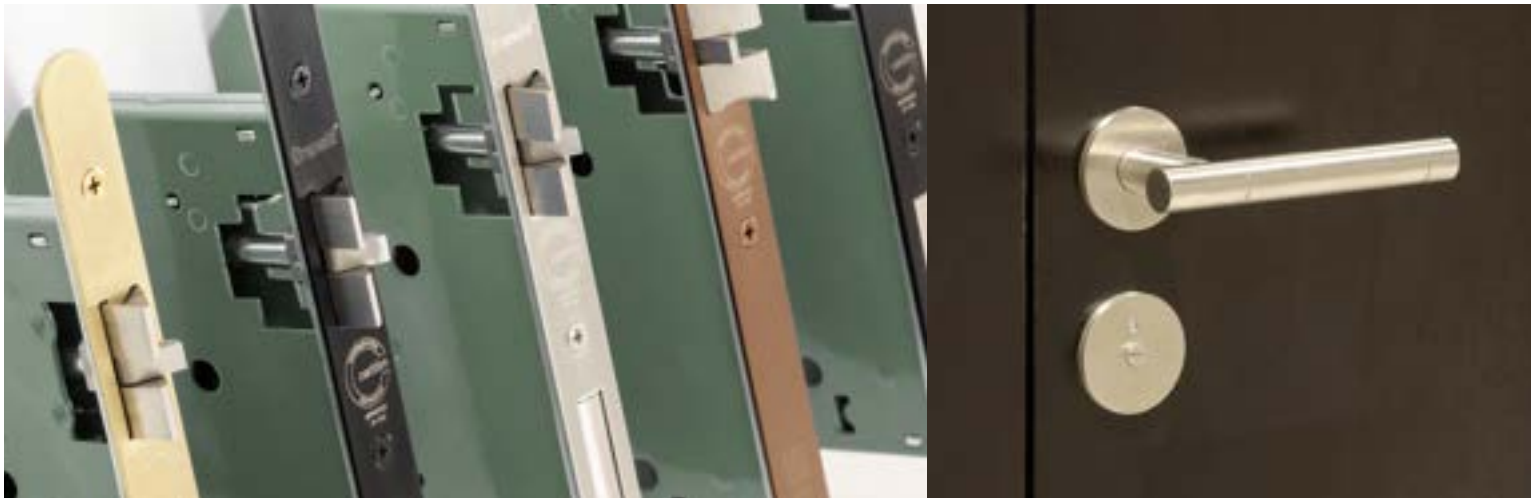

Premium Locks

Our premium range of lock cases use the latest technology to deliver a product that is loaded with key features. Such as the three-part silent action latch bolts, solid stainless-steel deadbolts and new follower grip technology.

All this results in a smooth, solid operation where lever handles return to their horizontal position time and again. With a 25-year mechanical guarantee our premium locks will give the end user hassle free operation. All locks are available in over 40 specialist finishes to match your project design brief.

Available as:

- + Mortice bathroom lock with triple latch
- + Mortice escape lock with antitrust and triple latch
- + Mortice escape lock with triple latch
- + Mortice euro profile deadlock
- + Mortice euro profile sashlock with anti-thrust and triple latch
- + Mortice euro profile sashlock with triple latch
- + Mortice latch with triple latchbolt
- + Mortice night latch with antitrust and triple latch
- + Mortice night latch with triple latch

Eight

Made in the UK

We take great pride in the fact that all our products are made in the UK, known for its engineering excellence. Utilising the latest machinery and techniques, we ensure top-notch quality in every product through rigorous testing and quality control processes. Our skilled engineers and craftsmen bring their expertise and passion to every step of the manufacturing process, making products that last.

Additionally, we offer a bespoke design service to meet our clients' unique needs. Whether you need specific dimensions, features, or colours, our team is dedicated to realising your vision. Our advanced colour matching technology ensures precise and consistent hues for your project. Experience the perfect blend of superior UK craftsmanship and innovative design with us, where your products reflect your style and requirements.

Accessories

Within the Incasa range we are able to offer matching accessories to cover every project requirement. From door stops to bathroom turn, cupboard knobs to coat hooks. All designed to complement your selected lever handle or pull handle profile.

Signage

Our new range of Clearline signs are compliant with BS5499 and with their clear boarder pick up the door surface material helping blend the signs in the door face.

- + Project management
- + On-site technical support

Environmental

We continue to review our ESG policies and procedures and they form the starting point for all our decisions, finding new ways to ensure all of our products and services have the least impact possible of the environment and are sustainable.

Our four environmental pillars are:

- + 25 Year guarantee on core mechanical items (hinges, door closers, locks and lever handles)
- + Maintenance free products
- + Sourced in the UK, all Incasa products are manufactured in the UK
- + Omitting all single use plastics from our packaging

For more details on our approach to ESG please contact enviromental@franchi.co.uk
