

# DENNY

**Denny** Town Centre's new £7.8m development brings a bright two-storey split level building consisting of 10 bespoke retail units and a community library. This is complemented by a community-designed town square featuring 4 public art commissions and event space. The jewel in the crown is the new Denny Library offering a welcome and relaxed community space in the heart of the town - attracting 1000 new customers in its first year. As Scotland's first digital town the town offers free outdoor Wifi and its own Denny town centre website designed to support local residents, visitors and business through a custom made page driving footfall into the new town centre. Construction started in 2015 with completion of the new building marked this summer with a Celebration Event attracting thousands of local people keen to enjoy their new town centre. Two further phases are in the pipeline.
