

How many chairs fit a dining table

Rectangular

The chair used in the example has a width of 46,5 cm. The frames of rectangular tables can be positioned 14 (A), 20 (B) or 26 (C) cm from the sides. The exact space between the frames depends on the type of table frame. The frames of the 350 and 400 cm tables have a fixed position. You do not have to decide on the positioning when you purchase the table. All mounting positions are already in the tabletop so you can always change the position yourself.
