# 15 Good Reasons to Buy a SunnCamp

## VENTILATION

Ventilation is important to reduce the effects of condensation inside an awning. All SunnCamp awnings have ample ventilation to keep the effects to a minimum.

## SEWN IN CARAVAN SEALING PADS

The majority of SunnCamp's Platinum range of awnings are now fitted, as standard, with caravan sealing pads and poles to help create an unrivalled weather seal between your awning and caravan. Most other manufacturers will charge you extra for these.

## PEGGING POINTS

SunnCamp Active Awnings have strong pegging points which are heavily reinforced with Oxford material. These stress bearing points are securely sewn in place using double bar tacking or flag stitching.

## GUYING TABS

SunnCamp Active Awning guying tabs are strong, reinforced and made from an Oxford material. They are carefully designed to spread the load and support the poles.

## COLOUR CODED POLES

SunnCamp awnings are designed to be easy to pitch and come with full instructions. To make set up even easier most poles and pole sleeves are colour coded.

## ADJUSTABLE TENSION STRAPS

Most SunnCamp awnings feature adjustable tension straps. Loosen the tension straps to insert the pole and then tighten the tension straps to help create the perfect pitch without struggling.

## QUICK FIX PADS

SunnCamp Traditional Awnings are supplied complete with 'Quick Fix Pads' allowing quick and easy attachment of the awning frame without damage to your caravan.

## ALUMINIUM FRAME OPTION

The Mirage awning has the option of a lightweight aluminium frame featuring the easy to adjust 'Quick Lock' bracket. The aluminium frame is supplied as standard with the Galaxy.

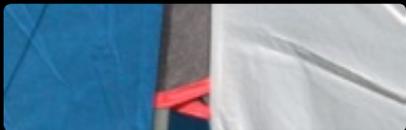

## WASHABLE BASE PANEL

SunnCamp Acrylic Awnings feature a hard wearing and durable PVC coated polyester base panel offering extra protection and allowing easy cleaning.

## POLE SLEEVES

SunnCamp Active Awning pole sleeves are constructed using a tough Oxford material to reduce the chances of pole damage. The pole sleeves are also slick on the inside to allow easier pole threading.

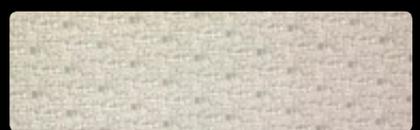

## HIGH VISIBILITY GUYLINES

Guylines can be a dangerous trip hazard, especially with children around! On Active Awnings our pre attached high visibility guylines reduce this hazard to a minimum.

## DOUBLE COATED POLYESTER ROOF

The durable polyester used for the Mirage and Galaxy roof panels is double PU coated for extra protection and is patterned on the inside, giving the awning a stylish look and a luxurious finish.

## VARIO PEGGING SYSTEM

SunnCamp Acrylic Awnings have pegging point clips inside and outside which gives you the choice of fitting the Ladder Bands for an internal or external mudflap (To suit your preference).

## ZIPS

Zips are the most used and vulnerable part of an awning. SunnCamp awnings are all fitted with strong rugged zips, compare them to other brands and you'll see the difference!

## STORM MATE SYSTEM

Brackets are pre-fitted to the Mirage and Galaxy awnings to accept the optional 'Storm Mate Kit', a heavy duty fully adjustable storm strap to help keep your awning secure.

	<b>Platinum</b> <i>Active Awnings</i>	Stylish and innovative designs, these models have high specification 150D Oxford Polyester flysheets and are loaded with SunnCamp features.	Page 4 - 6
	<b>Classic</b> <i>Active Awnings</i>	Stylish and innovative designs, these models have 75D 'Sunntec' Polyester flysheets, come with SunnCamp features and offer high quality, reasonably priced awnings, to the caravanner.	Page 7 - 9
	<b>Acrylic Awnings</b>	Traditional style and Active style awnings made with 'Sunntex' acrylic flysheets. 'Sunntex' is a durable, hardwearing fabric and can have a life span of up to four times longer than polyester.	Page 10 - 11
	<b>Motor Awnings</b>	'Drive away' Motorhome Awnings offering stylish and innovative designs suitable to fit a range of vehicles such as RV's, campervans and motorhomes with a height of up to 260cm. 'Sunntec' and 150D Oxford Polyester fabrics are used within this range.	Page 12 - 13
	<b>Utility Tents</b>	Structures to complement your awning and caravan, creating additional living and storage space as required. These structures are also suitable for garden use.	Page 14
	<b>Shelters</b>	Windbreaks to complement the SunnCamp range of Active Awnings. These shelters are also useful for garden and beach use.	Page 15

**HYDROSTATIC HEAD**

SunnCamp Active Awnings have a coating to provide a level of waterproofing in excess of British Standard requirements. All Platinum models have a Hydrostatic Head of 5000mm whilst the Classic models measure 4000mm.

**FLAME RETARDANT**

SunnCamp awnings are constructed using flame retardant fabrics throughout. In the event of the worse happening, this will give you and your family valuable extra time to evacuate.

**OXFORD FLYSHEET**

SunnCamp's Platinum range of caravan awnings and most motorhome awnings are manufactured using a strong, heavy duty 150D Oxford Polyester flysheet which is twice as thick as most regular flysheets. The 150D Oxford Polyester fabric is flame retardant, UV resistant and also has a luxurious soft touch, you can really feel the difference!

**POLYESTER FLYSHEET**

SunnCamp's specially sourced 'Sunntec' Polyester is a 75D high thread count Taffeta smooth weave material which is very strong and provides high weather and UV protection. 'Sunntec' Polyester will not sag when it gets wet unlike some inferior products.

**ACRYLIC FLYSHEET**

SunnCamp's specially sourced 'Sunntex' fabric is a heavy duty, hard wearing 280gm/m2 polyester with an acrylic coating. The material is solution dyed to give vivid colour that will last.

**TAPED SEAMS**

All possible seams on polyester and oxford flysheets are heat sealed with polyurethane tape to give extra waterproof protection. These seams do not normally require any further seam sealant.

**X-FLEX POLES**

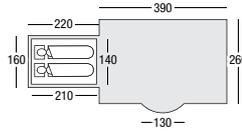

Acrylic Active awnings are manufactured using the X-Flex shatterproof pole system, a fibreglass pole encased in a strong PP sheath giving it the strength of steel! We are so confident in the X-Flex pole that we offer a **Five Year Warranty**, giving you complete peace of mind (Conditions apply, full details available from your dealer).

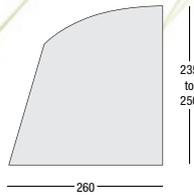

## MIRA 390

### OPTIONAL EXTRAS AVAILABLE FOR YOUR SUNNCAMP AWNING:

#### QUICK LOCK ALUMINIUM FRAME

The SunnCamp Mirage is supplied with a sturdy steel frame as standard but also has the option of a lightweight aluminium frame. The aluminum frame is fitted with Quick Lock brackets, an easy to adjust clamp which replaces the normal thumbscrew adjustment, making the awning even easier to set up!

#### ZIP IN ANNEXES

Enhance your SunnCamp awning with a zip in annex extension which is available for selected models. These may be purchased from your dealer as an optional extra.

#### INNER TENTS

On particular models you may increase the sleeping capacity of the awning by simply fitting an Inner Tent complete with sewn in groundsheet. These may be purchased from your dealer as an optional extra.

#### STORM MATE KITS

The Storm Mate System provides security and peace of mind. SunnCamp Traditional Awnings are compatible with the Storm Mate Kit which can be purchased as an optional extra from your SunnCamp dealer. The heavy duty storm straps simply clip into the attachments already sewn into the awning.

#### CANOPY POLE KITS

A number of SunnCamp awnings feature canopy doors which can be used as protection against both the sun and rain. The canopy pole kit comes as standard in some models but where it does not, can be purchased as an optional extra from your SunnCamp dealer by quoting the code DT0032.

### SPARE ACCESSORIES AVAILABLE FOR YOUR SUNNCAMP AWNING:

#### QUICK FIX PADS

The most advanced system to attach your awning to your caravan, the Quick Fix Pad clamps onto your awning and accepts the roof bar's hook. SunnCamp Traditional Awnings come complete with these as standard but spares are also available from your SunnCamp dealer.

#### LADDER BANDS

Many SunnCamp awnings use a Variable Ladder Band pegging point to give the best adjustment when pitching your awning. As a perishable item these are easily replaced with spares or repaired/extended with Ladder Pegging Band Extensions (DT0035), both are available from your SunnCamp dealer.

#### DRAUGHT SKIRT

Most SunnCamp Awnings are supplied complete with Draught Skirts but these can become unsightly with extended use. Replacement Draught Skirt is now available off the roll from your SunnCamp dealer.

#### EASY FIT AWNING WHEEL ARCH COVER

Complement your awning with this NEW lever action, suction fit Wheel Arch Cover which prevents the use of screw-in or glue on fittings to the side wall of your caravan. This may be purchased from your dealer by quoting reference DT0034.

A full range of replacement parts are also available, spare fibreglass poles, replacement high visibility guylines, a full range of replacement pegs and replacement SunnCamp compression carry bags can all be ordered from your SunnCamp Dealer. A Breathable Groundsheet/Underlay is available for some awning models.

### CO-ORDINATED FURNITURE AND ACCESSORIES

Co-ordinate your camping experience with products from the extensive range of accessories available from SunnCamp. Go to [www.sunnccamping.com](http://www.sunnccamping.com) to see the full range.
