15 Good Reasons To Buy A SunnCamp

**GUYING TABS**
SunnCamp guying tabs are strong, reinforced and made from an Oxford material. They are carefully designed to spread the load and support the poles.

**LIGHT LIVING AREA**
SunnCamp’s clever colour combinations allow light into the living areas whilst keeping sleeping areas as protected from the early morning light as possible.

**POLE SLEEVES**
SunnCamp pole sleeves are constructed using a tough Oxford material to reduce the chances of pole damage. The pole sleeves are also slick on the inside to allow easier pole threading.

**VENTILATION**
Ventilation is important to reduce the effects of condensation, especially in fully enclosed tents. All SunnCamp tents have ample ventilation to both living and sleeping areas.

**HIGH VISIBILITY GUYLINES**
Guylines can be a dangerous trip hazard, especially with children around! Our pre attached high visibility guylines reduce this hazard to a minimum.

**DOUBLE SEAM GROUNDSHEET**
Our SIG System includes a clever double seam construction with additional valance/mudwall, to give the vulnerable groundsheet seam extra protection from the elements.

**TAPED SEAMS**
All possible seams are heat sealed with polyurethane tape to give extra waterproof protection. These seams do not normally require any further seam sealant.

**ADJUSTABLE TENSION STRAPS**
SunnCamp tents feature adjustable tension straps. Loosen the tension straps to insert the pole and then tighten the tension straps to help create the perfect pitch without struggling.

**PEGGING POINTS**
SunnCamp tents feature strong pegging points which are heavily reinforced with Oxford material. These stress bearing points are securely sewn in place using double bar tacking or flag stitching.

**HEAT REFLECTIVE GROUNDSHEET**
All SunnCamp tents come complete with our latest heat reflective groundsheets. The upper side is aluminium coated to reflect back some of the heat normally lost to the ground.

**COLOUR CODED INNER TENTS**
SunnCamp inner tents have colour coded hanging points making it easier and quicker to install them in flysheet first tents.

**COLOUR CODED POLES**
SunnCamp tents are designed to be easy to pitch and come with full instructions. To make set up even easier poles and pole sleeves are fully colour coded.

**DOUBLE SEAM COVERED ZIPS**
Zips are the most used and most vulnerable part of a tent. SunnCamp tents are fitted with strong self repairing zips with double seamed zip covers for greater protection.

**EASY-FIT PORCH POLE**
Many SunnCamp tents feature a handy rain porch over the main doors. These tents feature a unique Velcro "Easy-Fit Pocket" which means you don’t have to struggle or strain to fit the pole in position. Yet another SunnCamp innovation.
# 15 Good Reasons To Buy A SunnCamp

High specification tents with polyester flysheets and fully integrated sewn in groundsheets. These tents are loaded with SunnCamp features.

---

## Classic

Classic styled tents with polyester flysheets. This range offers value for money, allowing quality tents to be more accessible to the camper than ever before.

---

## Angling

Quality tents and shelters for the Angler/Fisherman in a functional olive green colour.

---

## Festival Tents

Tents with individuality and style for the festival goer who wants to be noticed.

---

## Frame Tent

The Frame Tent is given a twenty first century makeover with a technical acrylic coated flysheet.

---

## Garden Tents

Tents that are ideal for providing shelter at garden parties, barbecues, outdoor events or even alongside your pitch on-site.

---

## Utility Tents

A range of various structures to complement your tent, awning, caravan or trailer tent, creating additional living, storage and sanitation space as required. Some of these structures are also suitable for garden use.

---

## Shelters

Windbreaks to complement your tent, awning, caravan or trailer tent. Beach Shelters and Sunnshelters.

---

## CANOPIES & EXTENSIONS

A range of canopies and tent extensions designed to complement tents within the SunnCamp range. Some of these products are compatible with tents from SunnCamp's previous year's ranges and other tents available in the market place.

## HYDROSTATIC HEAD

SunnCamp’s ‘Sunntec’ polyester flysheets have a Polyurethane coating to provide a level of waterproofing in excess of British Standard requirements. Signature and Platinum models have a Hydrostatic Head of up to 5000mm whilst the Classic Range measures up to 4000mm.

## FLAME RETARDANT

All SunnCamp tents are constructed using flame retardant fabrics not only for the flysheet but also for the inner tents and groundsheets. In the event of the worst happening, this will give you and your family valuable extra time to evacuate.

## SIG SYSTEM

The SIG System quite simply means that we sew a groundsheet throughout the whole of the flysheet creating a fully sealed unit, keeping out all the creepy crawlies as well as the elements. With inner tents sitting on top, you get double protection at night!

## POLYESTER FLYSHEET

SunnCamp's specially sourced ‘Sunntec’ polyester is a high thread count Taffeta smooth weave material which is very strong and provides high weather and UV protection. Sunntec polyester will not sag when it gets wet unlike some inferior products. All SunnCamp models are constructed with a 190T fabric.

## ACRYLIC FLYSHEET

SunnCamp’s specially sourced ‘Sunntex’ fabric is a heavy duty, hard wearing 280 gm/square metre Polyester with an acrylic coating. The material is solution dyed to give vivid colour that will last.

## TAPED SEAMS

All possible seams are heat sealed with polyurethane tape to give extra waterproof protection. These seams do not normally require any further seam sealant.

SUN CANOPIES AND TENT EXTENSIONS
A range of Sun Canopies and Tent Extensions are now available to fit various models within the SunnCamp Tent Range. Full Details can be found on page 23.

FITTED TENT CARPETS
Our Made to Measure Fitted Tent Carpets are specially tailored to fit the living area of your SunnCamp tent. These cosy polyester flannel carpets have a foam mid layer to add warmth and comfort to your tent, reduce groundsheet noise and are fully washable with a durable heavy duty PVC backing. For added safety and peace of mind they are also flame retardant.

CANOPY POLE KITS
A number of SunnCamp tents feature canopy doors which can be used as protection against both sun and rain. This canopy pole kit comes as standard in some models but where it does not, can be purchased as an optional extra from your dealer by quoting the code DT0032.

FOOTPRINT GROUNDSHEETS
Protect your ‘Sig System’ (Sewn in groundsheet) with our new ‘Made to Measure’ Footprint Groundsheets. Tailored to fit your SunnCamp tent, these fully eyeleted PE groundsheets sit between the ground and the base of your tent, reducing the chance of puncture while helping to keep the underside of your tent clean. For safety these Footprint Groundsheets are also flame retardant and come with their own carry bag with handle.

COORDINATED FURNITURE AND ACCESSORIES
Co-ordinate your camping experience with products from the extensive range of accessories available from SunnCamp. Go to www.sunncamp.com to see the full range.
