

ACTIVITY TITLE:

Make a Website

BOOT UP:

This activity provides an introduction to the types of coding used in making a website. Using HTML and CSS, you will rebuild an existing website step-by-step. The full tutorial lasts approximately 4 hours but is broken into different modules.

LOADING ...

1. Log on to <https://www.codecademy.com/>. If you haven't already, create an account.
2. Once you're logged in look in the course catalog for the course called "Make a Website" and click the Start button. This might be recommended to you as "Build a Professional Website" instead.
3. Read the introduction and then follow the instructions!

ACTIVITY HOSTS

Objective: Use technology to create new knowledge and artefacts.
Use technology to express creativity and to communicate.

There are many free website builder tools available online, www.wordpress.com

www.weebly.com and www.wix.com are just three that can be used to create a group, class or even school website.

FINAL STEP!
