Coins of England & The United Kingdom

Coins of England needs little introduction to most numismatists. It has become the standard reference work for United Kingdom coins since it was first published by Seaby many years ago. Where the COIN YEARBOOK is a handy guide to the most commonly encountered coins and an ideal quick reference, *Coins of England* is a far more in depth publication covering die varieties, types etc. Now split into two volumes the book covers all English coins up until decimalisation in the main book with all coins produced since the UK went decimal covered in the smaller volume. Both books are now hardback.

The Gold Sovereign Series

The first revised edition of the Token Publishing Ltd imprint of Michael Marsh's *The Gold Sovereign* was published in 2017 to coincide with the 200th anniversary year of the famous coin. Since then this book, fully revised and updated by Steve Hill of Sovereign Rarities (formerly of Spink and Baldwins), has become the reference work on the sovereign, half sovereign and quarter sovereign.

The new, second revised edition, has once again been updated by Steve with all new sovereigns and fractionals issued since 2017 added, and now, for the very first time, the five sovereign and two sovereign coins are included too. All are featured in one hardbound, profusely illustrated volume, making this the absolutely definitive work on this iconic series. Once again an accompanying price and rarity guide is included.

Bringing together never before seen information, facts, figures and fabulous illustrations, this new title is set to become the standard reference work on the subject. Covering the history of the guinea from its beginnings in the reign of the newly restored monarch Charles II to its demise as a circulating coin and subsequent replacement by the modern gold sovereign in the time of George III, this book provides all you need to know about the "golden guinea" and all its varieties. The Tribes & Coins of Celtic Britain

The Celts left no written records and the only historical accounts we have of them derive mainly from Roman writers. This makes archaeological finds all the more important and Celtic coins, in particular, unique as sources of information. This useful book outlines the history of the coins that we know of and the people who made them.

British Celtic Coins: Art or Imitation?

This new book looks at Celtic coins in a whole new way—are they works of art in their own right? Did they copy the Greeks? If they did how much knowledge did they have of Greek coins and where did that knowledge come from? What is the true story of coinage in pre-Roman Britain?

Now's your chance to find out!

Chinese Numismatics

This is the first book to explore the history of the field of Chinese numismatics from both Eastern and Western perspectives. Consisting of four papers that complement each other beautifully, it gives a sound introduction to the study of Chinese numismatics, focusing on the 19th century and, crucially, how to think about Chinese money.

In *Currencies of Ancient China from their Origins to the Late Empire*, François Thierry notes how Europeans sometimes understood Chinese money and sometimes got it completely wrong. In *Numismatic Friendship: Social Networks of Numismatists and Coin Collectors During the Late Qing Dynasty*, Lyce Jankowski opens up the world of Chinese collectors of Chinese coins, their networks and motivations. In *A Short History of Chinese Numismatics in Western Languages*, Helen Wang surveys publications to 1900, giving information about the authors, their occupations, motivations and areas of interest; and in *Chinese Money Matters, So Why Does It Have Such a Low Profile?* she looks at the current situation, and offers routes into the field. In his *Introduction*, Joe Cribb reflects on his study of Chinese money and how it has informed his career in numismatics.

The Naval Meritorious Distinguished Medal

£40.00

+p&p

The Naval Meritorious Service Medal is an account of the development of the medal which largely replaced the Distinguished Service Medal from 1918 as an award for acts of gallantry not under enemy fire, as well as providing an appropriate award to recognise the many men who provided long and meritorious service. This medal has previously remained largely un researched but this account draws together the surviving recommendations for these awards, including an analysis of the campaigns for which the awards were made as well as detailing the Army and Royal Air Force Meritorious Service Medal awards made to Naval personnel providing a definitive history of these awards.

Heroes of the Albert Medal & More Heroes of the Albert Medal

The Albert Medal was instituted by Royal Warrant on March 7, 1866, as an award for gallantry shown in saving, or attempting to save, life at sea. Ten years later, a new Royal Warrant created the Albert Medal for Saving Life on Land. The medal quickly became regarded as the premier award for gallantry "not in the face of the enemy"; in fact, the civilian equivalent of the Victoria Cross. The award could also be made to servicemen and women who performed acts of gallantry in the course of their daily lives, both in wartime and in times of peace. These recipients were featured in "Heroes of the Albert Medal". "More Heroes of the Albert Medal" concentrates on the many civilian recipients of this rare and hard-won award who did not survive to become holders of the George Cross in October, 1971.

This important title covers all the Awards and Honours bestowed upon the Officers and Men of the Prince of Wales's (North Staffordshire) Regiment during World War I and later in the conflict in the Balkans.

Without a doubt this is the easiest way to discover whether that simple pair to a Lieutenant was in fact awarded to an MC winner or whether that 1914 Star once sat proudly next to a DCM. It is essential reading for anyone with any North Staffs medals in their collections!
