Objectives and Investment Policy

- The STOXX® Europe Select Dividend 30 (Price Index) as closely as possible. In this regard, it aims to replicate the benchmark (Index).
- The Index measures the performance of 30 leading stocks by dividend yield from the STOXX® Europe 600 index that meet specific criteria. The Index includes companies which, at the time of inclusion, have paid dividends in four out of five calendar years, have a non-negative dividend growth rate over the past five years, have a dividend to earnings-per-share ratio of 60% or less, and meet criteria for trading volume. The Index is weighted according to net dividend yield with individual companies capped at 15%. The Index is rebalanced annually and selections of components are subject to index rules that favour components within the Index prior to its rebalance. In addition, the index is subject to quarterly and ongoing reviews that allow for the removal of a company, at the index provider’s discretion, if it no longer complies with the original selection criteria.
- The Fund mostly invests in equities in order to achieve the investment objective.
- The proportion of assets in the Fund which matches the weighting of the Index (duplication percentage) is at least 95% of the Fund’s assets.
- It is not the Investment Manager’s intention to leverage the Fund. However, the Fund may generate minimal amounts of leverage from time to time, for example, if using financial derivative instruments (FDIs) for efficient portfolio management purposes.
- Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- The units in the Fund are distributing units. Income from the Fund’s investments will be paid out at least once a year as a dividend.
- The Fund units are denominated in Euro.
- The units are listed on one or more Stock Exchange(s). Investors can buy or sell their units daily during business hours through an intermediary on such Stock Exchange(s).

For more information on the Fund, share/unit classes, risks and charges, please see the Fund’s prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Investors dealing on exchanges will pay fees charged by their stock brokers. Such charges are publicly available on the exchanges on which the units are listed and traded, or can be obtained from stock brokers. If investors deal in units directly with the Fund or the Management Company of the Fund, the entry charge is up to 2% and the exit charge is up to 1%.

*Authorised participants dealing directly with the Fund or the Management Company (as the case may be) will pay related transaction costs.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2019. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

One-off charges taken before or after you invest

Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund’s annual performance in EUR for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund’s net asset value at each year-end. The Fund was launched in 2005.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.
